66th Annual Catalogue of the Baltimore College of Dental Surgery

The oldest and for many years the only dental college in the world, chartered in 1836 by an act of the legislature of the state of Maryland.

Baltimore, Md. 1905-'06
BALTIMORE COLLEGE
OF DENTAL SURGERY

THE OLDEST DENTAL COLLEGE IN THE WORLD

SIXTY-SIXTH
ANNUAL ANNOUNCEMENT
CATALOGUE 1905-1906

DENTAL INFIRMARY
OF THE
Baltimore College of Dental Surgery

OPEN DAILY DURING ENTIRE YEAR FROM 1 TO 5 P. M.
LABORATORY OPEN FROM 9 A. M. TO 5 P. M.

MORNING
CLINICS DURING REGULAR SESSIONS

Many of the Operations are Performed Free of Charge
and others at the Cost of Material Only

The Infirmary is in charge of the Professors and Demonstrators of the College, and is daily
crowded with patients, who are operated on by Students of the College.
All anaesthetics in use are administered in the Extraction of Teeth and in Surgical Oper-
ations of the head and face.
All the different materials are employed in the construction of artificial teeth.
Infirmary and Laboratory in the College Building, Cor. Eutaw and Franklin Sts., Baltimore.
The Baltimore College of Dental Surgery.

Chartered by the Legislature of Maryland in 1839.

THE OLDEST DENTAL COLLEGE IN THE WORLD

FACULTY.

M. WHILDLIN FOSTER, M.D., D.D.S., Professor of Therapeutics and Pathology.
WM. B. FINNEY, D.D.S., Professor of Dental Mechanism and Metallurgy.
B. HOLLY SMITH, M.D., D.D.S., Professor of Dental Surgery and Operative Dentistry.
THOMAS S. LATIMER, M.D., Professor of Physiology and Comparative Anatomy.
WILLIAM SIMON, Ph.D., M.D., Professor of Chemistry.
CHARLES F. BEVAN, M.D., Clinical Professor of Oral Surgery.
J. W. CHAMBERS, M.D., Professor of Anatomy.
WM. F. LOCKWOOD, M.D., Professor of Materia Medica.

LECTURERS.

STANDISH McCLEARY, M.D., Regional Anatomy.
EDW. HOFFMEISTER, Ph.D., D.D.S., Materia Medica.

WILLIAM B. FINNEY, D.D.S., Professor of Dental Mechanism and Metallurgy.
B. HOLLY SMITH, M.D., D.D.S., Professor of Dental Surgery and Operative Dentistry.
THOMAS S. LATIMER, M.D., Professor of Physiology and Comparative Anatomy.
WILLIAM SIMON, Ph.D., M.D., Professor of Chemistry.
CHARLES F. BEVAN, M.D., Clinical Professor of Oral Surgery.
J. W. CHAMBERS, M.D., Professor of Anatomy.
WM. F. LOCKWOOD, M.D., Professor of Materia Medica.

CLINICAL INSTRUCTORS.

T. S. WATERS, D.D.S., Chief Clinical Instructor, Resident, Md.
CORYDON PALMER, D.D.S., Ohio.
E. PARMLEY BROWN, D.D.S., N. Y.
A. L. NORTHROP, D.D.S., N. Y.
E. L. HUNTER, D.D.S., N. C.
W. W. WALKER, D.D.S., N. Y.
Oscar Adelburg, D.D.S., Md.
G. MARSHALL SMITH, D.D.S., Resident, Md.
Cyrus M. Gingrich, D.D.S., Md.
R. B. DONALDSON, D.D.S., D. C.

Curator, R. Bayly Winder, Ph.D., D.D.S.

DEMONSTRATORS.

GEO. E. HARDY, M.D., D.D.S., Demonstrator of Mechanical Dentistry.
EDW. HOFFMEISTER, Ph.D., D.D.S., Demonstrator of Chemistry.

ASSISTANT DEMONSTRATORS.

J. K. BURGESS, D.D.S.
HARRY E. KELSEY, D.D.S.
J. C. SUTHERLAND, D.D.S.
H. M. LEVER, D.D.S.
C. S. GORE, D.D.S.
L. D. CORELL, D.D.S.
R. B. BERRY, D.D.S.

L. F. PALMER, D.D.S.
L. R. PENNINGTON, D.D.S.
J. W. WORHNA, D.D.S.
B. J. GORMAN, D.D.S.
G. J. SMITH, D.D.S.
C. E. DELLINGER, D.D.S.
H. V. LEVONIAN, D.D.S.

C. D. SADLER, D.D.S.
C. H. SCHLINKMAN, D.D.S.
M. B. SHOEBE, D.D.S.
J. D. BIGGS, D.D.S.
H. H. STREET, D.D.S.
J. D. DUKE, D.D.S.
F. J. BARCLAY, D.D.S.

H. H. HAYDEN, M.D., Demonstrator of Anatomy.
C. F. BLAKE, M.D., Demonstrator of Anatomy.
L. F. KORMAN, M.D., Assistant Demonstrator of Anatomy.

The Sixty-sixth Annual Session will commence on the 1st of October, 1905, and continue until May, 1906.

The Infirmary is open during the entire year for Dental Operations.

Students corresponding with the Dean will please be careful to give full address and direct their letters to

M. W. FOSTER, M.D., D.D.S., Dean,
9 WEST FRANKLIN STREET, BALTIMORE, Md
The following Board of Visitors have been appointed by the Faculty. This Board holds annual meeting and appoints, every year, a committee from its members to attend the final examination of the graduating class and advise with the Faculty as to the qualifications of candidates for the Degree of Doctor of Dental Surgery.

From this Board there will also be selected, each year, a number of gentlemen, who shall hold clinics and deliver clinical lectures during the collegiate term.

The members of the State Board of Dental Examiners are also invited to be present.

ANNOUNCEMENT.
1905-06.

The Sixty-sixth Regular Course of Instruction in the Baltimore College of Dental Surgery will begin on October 1, 1905, and continue until May, 1906. The oldest of Dental Colleges, this institution enters on the sixty-sixth year of its career with its prospects for usefulness brighter than ever before. It has added to its Faculty and Clinical Corps strong and active men and is better equipped than at any period of its existence. It makes no special claim to the consideration of the dental profession and public aside from its actual worth as an instructor of young men in a specially, and claims only the modest place of aiding in developing with others (what it did for so many years alone and opposed) a single science and art. The results of its work in these sixty-five years are world-wide in their influence upon dentistry.

Two thousand four hundred and thirty-six (2,436) graduates have gone from this College into practice, and these are scattered all over the civilized world. They are located in nearly every city of Europe. They lead the profession in all the great centres of civilization, and have won eminence in England, France, Russia, Prussia, Switzerland, Spain and Italy. They have carried the honors of the institution into Asia, Australia and the land of the pyramids, while in every State in the United States they have established their own worth and reputation of their Alma Mater.

The College may well point with pride to the standing of its graduates. Many of them have reached high stations in the profession; many have become renowned for their attainments, original discoveries and writings. They have met with signal honor abroad, nearly every Court dentist in Europe being a graduate of this institution. Very many of them are men of broad culture, who had been previously trained in other high educational institutions, and collectively they have developed a degree of worth and usefulness which reflect the highest credit upon the College. Five thousand five hundred and seventy-two (5,572) students have matriculated at this College.

The course of study, in addition to the regular lectures, embraces daily clinics in the College Infirmary and demonstration in the College Laboratory by the Professors and Demonstrators. The practical course of study runs through the entire year, the interim between the sessions being very highly prized and of vast service to the student. The opportunity is free to all matriculants.

The Faculty desires to state in this place that its diplomas are not purchasable. It would hardly seem creditable to the reputation of dentistry schools to be obliged to make this statement, but frequent applications, made almost every year, for the diploma on other terms than actual attendance on the lectures and a satisfactory examination at the close of the session indicate that this matter is not well understood.
The new College building, into which this College was removed in June, 1881, is one of the finest structures in Baltimore City. Every part of this spacious and handsome building is devoted to College purposes, except the large stores on the ground floor.

The "Infirmary Hall" is a model for space, architectural beauty and convenience, and is handsomely furnished. Situated on the second story, it occupies one-half of this extensive floor, the remaining portion of the same floor being devoted to the extensive Museum of the institution (which is a large and beautiful hall), the "Extracting Room," hat and coat room, toilet rooms, etc.

Immediately over the Infirmary is a large and handsome "Lecture Hall," capable of seating three hundred students. Opposite the Lecture Hall are the large halls devoted to "Laboratory" purposes, three in number, one of which is used exclusively for plaster work, furnace work, vulcanizing, etc.

The ceilings are some twenty feet high, with numerous windows corresponding in size, and the halls and rooms are furnished with beautiful chandeliers and gas fixtures. The entire building, fronting on two wide streets, has every advantage of location, light, etc. Wide stairways and corridors separate the principal halls. This fine structure has been erected without regard to cost.

During the summer of 1895 the interior of the College building was greatly improved. The floor of the Lecture Hall has been raised, giving an unobstructed view of the Lecture platform to students occupying the rear seats. The benches have been removed and the latest improvements in folding opera chairs substituted. The Infirmary has also been much improved. Stationary brackets have been placed at every chair. On this floor has also been added a toilet room for women.

Among the improvements are the electric motors for running all the lathes in the Laboratory and the attachment made in the Infirmary for electric mallets. Mallets will be furnished by the College.

Still more marked are the improvements for the session of 1903-04, as electric lights have been placed over each chair and fountain cuspidors beside each chair. Another improvement which will add to the comfort of students is a gallery extending across the south end of the Infirmary, where they can store their dental engines and instrument cases for safekeeping.

The entire establishment is thorough and complete in all its appointments, and is one of the finest and best equipped college buildings in the world devoted exclusively to dental instruction.

The site on Franklin St., adjoining the College, has been purchased. A building of modern design will be added to the present one. This addition, containing the same number of cubic feet as the present college building, will double its capacity and give the required room for the latest improved equipment of the dental and chemical laboratories, and students’ reading room. Also ample space will be reserved for cloak and general storage.

This College is extending relief to many thousand charity patients every year. The inmates of the Baltimore Manual Labor School, Child's Nursery Hospital, Baltimore Orphan Asylum, St. Vincent's Orphan Asylum, the Boys' Home, the Aged Men's Home, the Aged Women's Home, St. James' Home for Boys, St. Joseph's House of Industry, St. Paul's School for Girls, the Christ
Church Orphan Asylum, Spring Grove Asylum, Maryland Penitentiary, Baltimore City Jail, and, in short, without further enumeration, the inmates of every charitable institution of the City of Baltimore and its vicinity, of every character and form of religious belief, are freely invited to avail themselves of the advantages of the Infirmary, and are there treated without cost to the patient or to the institution from which they come. All the institutions enumerated, and many others, now depend for treatment of these diseases which the dentist alone can alleviate or cure upon the succor which the Infirmary of this College affords.

The Museum of the College is the growth of years, and is a large and rare collection of anatomical specimens. Plates and drawings and photographic prints of anatomical and physiological subjects (which are freely used in illustration of lectures) are in great number, exceeding variety and being constantly added to. The collection of dental morbid specimens is alone worth a visit to examine. A large number of beautiful pathological specimens have been recently added to the collection. The collections were commenced in 1839, and have continued without interruption until now; and, owing to the many years this College has been in existence, the supply of pathological and other specimens for illustrating the lectures and demonstrations is larger than in any other similar institution.

Located in a city of 650,000 inhabitants, the clinical matter is abundant, thereby enabling the student to carefully prepare himself for future practice, and instilling a degree of confidence which experience only can impart. Special lectures by eminent scientists are delivered during the session, in addition to the regular course; also clinics by celebrated operators.

The number of patients daily visiting the Infirmary is very large. All such patients are operated on by the students, under the careful supervision of the Professors and Demonstrators.

Since the close of the session of 1881–82, this College has formed an alliance with the College of Physicians and Surgeons, by which the students of the former can avail themselves of the extensive clinical facilities of the latter—unsurpassed in any institution of this State.

This College has been rebuilt during the year 1899 and is equipped with the latest modern improvements, the building being well lighted, well ventilated. In this building the Junior Class takes the Dissecting Course. The City Hospital is under the exclusive control of this institution.

The Dental Class is at liberty to attend any or all of the lectures on medicine and surgery at the College of Physicians and Surgeons, where the clinical material is superabundant.

The Faculty of this school, however, are distinctly of the opinion that those students who do not propose to graduate in medicine had better devote their time to the close study of dentistry, a proper knowledge of which can only be acquired by the closest attention to the Dental Infirmary and Laboratory. The study of general medicine, therefore, is, in our judgment, properly a post-graduate course of dentists. Graduates in dentistry are given advanced standing and are admitted to the second year, on condition that any studies required in the first year medical course not taught in the dental course shall be made up in their second year.
There has been started in this College and in the College of Physicians and Surgeons a joint "College Y. M. C. A." A large number of students from each of these colleges have joined the organization.

Religious services have been held at the Central Y. M. C. A. Building Sunday afternoons, at which addresses have been made by the leading ministers of the city and by students. Denominational or doctrinal matters are not mentioned.

As soon as the organization becomes sufficiently strong cozy reading rooms will be opened near the respective colleges. Two of the principal objects are: First, to welcome young men from Christian homes and try to prevent them from being enticed into evil ways by the allurements of a large city. Second, to raise the moral standing of the profession generally.

---

**COURSE OF STUDY.**

**DENTAL SURGERY AND OPERATIVE DENTISTRY.**—These chairs will embrace everything pertaining to Dental Surgery and Operative Dentistry, including the construction and application of appliances for correcting irregularities of the teeth and dental arch, treatment of dislocation and fractures of the maxillae, etc.

The different fillings of teeth, in their various classifications, materials used and methods of introducing the same, will be carefully explained and their relative importance clearly demonstrated. The different instruments used in Operative Dentistry, together with their formation, tempering, use, etc., will be carefully considered and fully discussed. Special instruction given in porcelain inlays.

**CLINICAL DENTISTRY.**—The Demonstrators, aided by the professors and clinical corps, will deliver Clinical Lectures at frequent stated terms during the session and hold Clinics for practical instruction.

**PATHOLOGY AND THERAPEUTICS.**—The Lectures of this chair will comprise such principles of Pathology and practice of medicine as are essential to a knowledge of pathological relations of the teeth to the other parts of the system, together with the symptoms, causes and treatment of all diseases which involve the dental structures, such as inflammatory action affecting the various tissue diseases of dental pulp, periodontitis, alveolar abscess, dental exostosis, dental caries, necrosis, etc., together with many other conditions which are of interest to the dental practitioner.

The Lectures on Therapeutics will comprise a comprehensive classification of medicines employed in dental practice, with a careful explanation of their properties and therapeutic effects, whether applied locally or otherwise.

**MECHANICAL DENTISTRY AND METALLURGY.**—The professor of this chair will aim to lay down the general principles which underlie the science and art of Dental Prosthesis. The student will be carefully taught discrimination in the selection of materials and their skillful use. Whatever is useful will be fully and copiously dealt with and things of doubtful utility carefully scrutinized. All
methods of merit will be fully noticed and the labors of inventors and others recognized. The course will combine aesthetic with simply useful mechanism.

The metallurgy of Dentistry and so much of Chemistry as is fairly included in the working of metals, porcelains, etc., will be fully dealt with, and also the details of Laboratory work, with the history, structure and properties of the materials with which the dental mechanist has to deal.

The lectures are fully demonstrated and illustrated to cover the ground of gold and metal plates generally, continuous gum and of the more commonly used and less costly materials, such as vulcanite and celluloid.

A complete series of demonstrations will illustrate the lectures on the art of preparing substitutes to supply the place of the natural organs and adapting them to harmonize with the character and expression the face.

In the Laboratory and Infirmary ample opportunity will be given to each student to perform, under the daily supervision of the demonstrators, every operation in Mechanical Dentistry.

SPECIAL ANATOMY AND DENTAL MATERIA MEDICA.—The lecturer of this chair will present to the class the anatomy of head and neck, with special reference to all operations performed by the dental surgeons. Those medicines used in dental practice will be described and their various applications to diseases of the mouth indicated. An effort will be made to make these branches as practical as possible.

PHYSIOLOGY.—This course of lectures will embrace microscopical anatomy, so that the physical character of organs and the physical principles involved in their action may be fresh in the memory of the students at the time of description of their functions and their physiological relations. The physiology of the dental organs will be very distinctly set forth. Special attention will also be paid to the nervous system. Digestion, normal and abnormal, will be thoroughly investigated, and the importance of oral digestion clearly defined, as being the first step in that process upon the perfection of which the remaining acts mainly depend. Special attention is paid to the microscopical anatomy of the dental structures.

CHEMISTRY.—It will be the aim of the professor of this chair to give an accurate knowledge of the principles of the science, dwelling especially upon those points which are of special interest to the dental student. The physiological relations of chemistry will be unfolded as far as practicable, leaving particular details to the chair of physiology. Careful attention will be paid to the chemistry of metals and all the materials used in dentistry; also to the vital chemistry of anæsthetics. The special chemistry of the mouth, the stomach and intestinal tube will be fully treated.

A chemical laboratory has been established with the view of enabling the students to become familiar with the characteristic properties and chemical reaction of such substances as are of practical interest in dentistry. A course in this laboratory is obligatory for all junior students. Although all apparatus and materials required by the students are furnished without extra charge, the students will be obliged to pay for breakage.

ANATOMY.—General anatomy will be thoroughly taught by this chair in the most careful manner. Models, plates and cadavers are abundantly supplied for the proper illustration of this subject. Special attention will be given to the
descriptive anatomy of the head, face and neck, which will also occupy the careful attention of the Professors of Special Anatomy and Physiology. Dissecting material will be supplied in abundance.

Bacteriology is taught by lectures and microscopic work in the Laboratory.

Oral Surgery.—Clinical Lectures on Surgery will be given weekly by this chair at the College of Physicians and Surgeons. Special attention will be paid to clinical operations in surgery upon the mouth and face. The College Dispensary furnishes an ample supply of material.

Materia Medica.—A complete course of Materia Medica and general therapeutics will be given by this chair, while special attention will be called to the nature and therapeutic uses of these drugs required in dentistry.

Monthly reviews of the more important parts of lectures will be given with the aid of the stereopticon.

Infirmary Practice.—The Faculty have spared no pains to make arrangements for the acquirement of practical skill commensurate with the importance of this branch of tuition. The Infirmary is open during the entire year, and is adequately supplied with operating chairs.

The operative and mechanical departments are now so well patronized that every student can obtain as much practice as it is possible for him to attend to. With the exception of Sunday, four hours are daily spent by the student in dental practice, under the supervision of the demonstrators and the professors. To allow each one equal opportunity, and to put the theories taught into practice, at the commencement of the session the students are divided into classes, which secures constant rotation through the operating and mechanical departments. The demonstrators are always present to give required information.

Modelling Classes.—The Freshman Class, in sections of eight, will be instructed in modelling and carving teeth in plastic materials. This is thought the better method of teaching the student the form, contour and anatomy of the teeth.

Crown and Bridge work is taught in the most thorough manner. The technique having been acquired from models, the practical work will be furnished in the College Clinics. The instructions are given in sections of eight, so each student will have an opportunity of being near the instructor.

Under the direction of the demonstrators, patients will be assigned to the students, who will be required to operate at the chair, and they will in this way be taught the various operations incident to Dental Surgery.

The intimate union of theoretical and practical instruction will be insisted on during the entire course, and, indeed, is considered as the one thing essential to becoming a competent dental practitioner.

In the Laboratory each student has his desk and work bench assigned to him, where his instruments can be kept under lock and key. Students are required to make experiments as well as practical pieces of all materials in use. Each student is expected to provide his own instruments, with the exception of extracting forceps, lathes and vulcanizers. All expenses attending operations upon College patients are borne by the College.

It will be of interest to dental students to have their attention called to the fact that the Infirmary and Laboratory are open during the Spring, Summer and
Fall daily, and that this department of the College affords practice throughout the entire year. The benefits of a large infirmary practice to the dental student cannot be well overestimated, as advantages are had which are entirely unobtainable in any private dental office. What students mostly feel their deficiency in and most lack the opportunity of obtaining under a preceptor—the actual handling of instruments and of witnessing and attempting for themselves the filling of teeth—are here enjoyed in full. There is always abundant material for practice, and both Infirmary and Laboratory are well equipped with instruments and apparatus. The large and interesting Museum of the College is also open to the constant inspection of students, and the study of many specimens of morbid anatomy cannot fail to be of essential service.

Ample opportunity in the dissecting room is afforded for the study of Practical Anatomy.

Weekly examinations are held by all professors, as reviews of the lectures delivered during each week of the session.

The Infirmary in the College building is open to patients for dental operations during the entire year.
TERMS OF GRADUATION,
STATUTES, ETC.

In accordance with the resolutions adopted by the National Association of Dental Faculties, the course of study is divided into Freshman, Junior and Senior terms.

The qualifications for entering the Freshman class are: Students shall be required to have an education which entitles them to enter the third year in a High School, or its equivalent, or a certificate from a Superintendent of Schools in the county in which the candidate resides.

A candidate who has received a collegiate degree or passed the matriculate examination of a recognized college, or who has a certificate from a normal or high school, or a teacher’s certificate properly attested may enter without examination.

The studies assigned to the Freshman class comprise Anatomy, Physiology, Chemistry, Dental Materia Medica, Didactic and Practical Mechanical Dentistry, Operative Dentistry, Pathology and Therapeutics.

Junior Year. The student in this year will be required to give special attention to Bacteriology and Orthodontia. The question of the etiology of malocclusion, including the comprehensive understanding of the variations of nervous and physical conditions attendant as well as those appliances necessary for the restoration to normality will be taught from a practical as well as theoretical standpoint.

In the Senior Year the preceding studies will be continued, with the major portion of time devoted to Operative and Prosthetic Dentistry.

Students will be examined at the end of each session progressively—or in accordance with the demands made of them. Freshmen and Juniors, however, who fail in their examinations will be accorded the privilege of a second examination at the commencement of the following session.

Each candidate for graduation must present himself for examination before the Faculty upon all subjects taught in this College. Prior to such examination he must show specimens of operations upon the natural organs and present approved specimens of dental mechanism constructed in the College; also, he must have attended full Winter courses of lectures in the College.

The following, however, will be considered as equivalent to attendance on one or two courses: The same time spent in any reputable Dental College prior to matriculation in this school.

Graduates of recognized medical schools will be admitted to the Second Year class without examination.

All students, whether graduates of medicine or dental practitioners, are required to attend regularly upon lectures, demonstrations and clinical duties
and be examined by each member of the Faculty. Degrees in absentia are not granted by this College.

Attendance upon three full courses, of not less than six months each, in separate academic years, shall be required before examination for graduation for all students matriculating on or after the session of 1902-03.

Punctual attendance upon Lectures and other College duties, respect to instructors and a strict observance of all the rules will be required of every student. Every student is required to operate in the Infirmary whenever called upon by the demonstrators unless excused by a special vote of the Faculty. The seats in the Lecture Room are numbered, and will be assigned on October 1 and thereafter to students who are present in the order of their matriculation. The Faculty reserves the right of withholding the degree from students of immoral character.

The fees for each session are: $100, Demonstrators' Fees included; Matriculation Fee, $5; Diploma Fee, $30; Dissecting Tickets, $10; Graduation Expenses, $5. Recent graduates of other Dental schools are admitted on paying the matriculation fee and $50—half the regular fees. Graduates in Dentistry of more than three years' standing, the matriculation fee only. These fees, with the exception of the Diploma Fee, must be paid on matriculating. All tickets will be issued by the Dean, to whom students are requested to report themselves immediately upon their arrival in the city. By leaving baggage at railroad depot until a boarding house is secured hotel bills can be saved.

The Faculty of this College has never made any extra charge for preparing students for examination, and have always freely given their services for such purpose.

Board may be obtained at from $3.50 to $5 per week at private boarding houses, the quality and terms of which are good and cheaper than in any other city. Several lines of splendid steamships come direct from the principal European ports to Baltimore.

The amount of money (about $50 per session) paid for books and instruments is a permanent investment lasting for life. It is impossible to practice dentistry without them. The expense is one that all practicing dentists must incur, and the sooner the student has the requisite number the better for him. Some students manage to go through college with a very limited supply. This is poor economy, as they should become thoroughly accustomed to handling all the necessary instruments during their collegiate course. It is much easier, when possible, to make these purchases during their first session. The College furnishes extracting forceps, vulcanizers and lathes.
PRIZES.—Several prizes will be awarded at the close of the session, among which will be a First and Second Honor Medal, given by the Faculty; Dental Engine and a set of Forceps from Faculty; a Vulcanizer, from L. B. Benton, Dental Depot; Freshman prize for carved work, Gold Medal, by Faculty; First Honor Junior Class, Bracket and Allen Table, by Charles R. Deeley Dental Depot; Twenty-dollar gold coin to the Senior excelling in non-cohesive gold filling, from Dr. C. M. Gingrich.

The College session opens October 1 and continues until May.

No students admitted after October 10 to the regular session.

The Infirmary in the College building is open during the entire year for dental operations, and students can enter at any time by paying $50, which is deducted from the fees of the succeeding regular Winter course.

Women will be admitted as students, subject to the same requirements as men.

The rules of this College conform to the requirements of the National Association of Dental Faculties and the National Association of Dental Examiners.

Alumni of the College who are permanently settled and other dental practitioners who desire to receive the Annual Catalogue regularly are respectfully requested to send their names and addresses to the Dean. The Catalogue is published each year at the close of the session, and contains course of study, terms, etc., and names of all the graduates of the College.

The addition to the Library is a donation of valuable works from the library of the late Dr. W. H. Dwinell, of New York; also valuable papers by the late J. W. Clowes, D.D.S.

Donations made to the College Museum of specimens will be gladly received and name of donor placed with specimens. Donated last year, very fine specimen of Salivary Calculii by the late J. W. Clowes, D.D.S.

Last year Dr. Corydon Palmer donated his valuable and rare collection of dental charts and appliances.

This year Dr. Kasson C. Gibson presented a rare collection of Dental works.

Students corresponding with the Dean will please be careful to give full address, and direct their letters to

M. W. FOSTER, M.D., D.D.S.,
Dean of Baltimore College of Dental Surgery,
No. 9 W. Franklin Street, Baltimore, Md.

SUMMARY.

Students of Senior Class ..................................................... 83
Students of Junior Class ..................................................... 43
Students of Freshman Class ................................................... 47

Total ................................................................. 173
CLASS HONORS.

Diamond Medal—R. K. BOYER, A. W. MCKAY, 564 possible 600.

Second Honor Medal—J. R. AMES, 5634.

Honorable Mention:
- W. H. MULHALL,
- A. H. SMALLWOOD,
- D. F. BURK,
- C. H. MASTERS,
- G. W. O'BRIEN,
- N. F. PRAED,

Operative Dentistry, Cohesive Foil, J. N. ARVIN
  Very Honorable Mention, G. W. LA LIBERTE.

Honorable Mention:
- W. H. MULHALL,
- A. H. SMALLWOOD,
- D. F. BURK,
- C. H. MASTERS,
- G. W. O'BRIEN,
- N. F. PRAED,

Operative Dentistry, Non-Cohesive Foil, H. YELVERTON.
  Very Honorable Mention, G. W. LA LIBERTE.

Mechanical Dentistry, A. H. SMALLWOOD.

Bridge Work, A. C. PARR.

Orthodontia, T. TUNNEY.

Junior Prize—L. R. GORHAM.
Freshman Prize—W. S. BRADDOCK.

First and Second Honor—Medal, given by Faculty
Operative Prize—Dental Engine, given by Faculty.
Mechanical Prize—Vulcanizer, given by L. B. Benton, Dental Depot.
Bridge-Work Prize—Set of Forceps, given by Faculty.
Essay on Orthodontia—Farrar on Irregularities, given by J. N. Farrar.
Freshman Prize—Gold Medal, given by Faculty.
Junior Prize—Bracket and Allen Table, given by C. R. Deeley, Dental Depot.
Twenty-dollar gold coin to the Senior excelling in non-cohesive gold filling, given by Dr. C. M. Gingrich.
REGULAR GRADUATES.

College of Physicians and Surgeons,  
BALTIMORE, MD.  

FACULTY.

ABRAM B. ARNOLD, M.D., Emeritus Professor of Clinical Medicine.

THOMAS OPie, M.D., Emeritus Professor of Gynecology.

THOMAS S. LATIMER, M.D., Professor of Principles and Practice of Medicine, and Medicine.

AARON FREIDENWALD, M.D., Professor of Diseases of the Eye and Ear.

CHARLES F. BEVAN, K.D., Professor of Principles and Practice of Surgery, Clinical and Genito-Urinary Surgery.

Wm. Simon, Ph.D., M.D., Professor of Chemistry.

J. W. Chambers, M.D., Professor of Surgical Anatomy, Operative and Clinical Surgery.

George J. Preston, A.B., M.D., Professor of Physiology and Diseases of the Nervous System.

N. G. Kehre, A.M., M.D., Professor of Pathology and Medical Jurisprudence.

C. Hampson Jones, M.B., C.M., (Edin.), M.D., Professor of Hygiene, Public Health and Clinical Medicine.

I. R. Trimbler, M.D., Professor of Anatomy and Clinical Surgery.

Wm. F. Lockwood, M.D., Professor of Materia Medica, Therapeutics, and Clinical Medicine.

Edward N. Brush, M.D., Professor of Psychiatry.

George W. Dobbin, M.D., Professor of Obstetrics.

B. Holley Smith, M.D., D.D.S., Professor of Principles and Practice of Dental Surgery as applied to Medicine.

Harry Friedenwald, A.B., M.D., Associate Professor of Diseases of the Eye and Ear.

Julius Friedenwald, A.M., M.D., Clinical Professor of Diseases of the Stomach and Director of Clinical Laboratory.

William S. Gardner, M.D., Associate Professor of Gynecology.

Frank Dyer Sanger, M.D., Clinical Professor of Diseases of Nose, Throat and Chest.

Standish McCleary, M.D., Associate Professor of Physiology and Demonstrator of Histology and Pathology.

Chas. E. Brack, M.D., Associate Professor of Obstetrics and Lecturer on Pharmacy.

John Eburn, M.D., Associate Professor of Diseases of Children and Demonstrator of Pathology.

H. H. Hayden, M.D., Associate Professor of Comparative Anatomy and Demonstrator of Anatomy.

Charles F. Blake, M.D., Associate Professor of Surgery and Assistant Demonstrator of Anatomy.

Associate Professor Genito-Urinary Surgery and Demonstrator of Dermatology.

Samuel J. Fort, M.D., Associate Professor of Materia Medica and Pharmacology.

Daniel Base, Ph.D., Associate Professor of Chemistry.

Alexius McGlannan, M.D., Associate Professor Physiological Chemistry and Demonstrator of Physiology.

Associate Professor of Surgical Anatomy.

Harvey G. Beck, M.D., Demonstrator of Clinical Medicine and Demonstrator in Clinical Laboratory.

Albertus Cotton, M.D., Demonstrator of Surgery and Assistant Demonstrator of Anatomy.

Thomas R. Brown, A.B., M.D., Demonstrator in Clinical Laboratory.

M. Ekstromer, M.D., Demonstrator of Chemistry.

W. W. Requardt, M.D., Demonstrator of Surgery.

G. W. Mitchell, M.D., Demonstrator of Diseases of Nose, Throat and Chest.

Archibald C. Harrison, M.D., Assistant Demonstrator of Anatomy.

Samuel Butler Grimes, M.D., Assistant Demonstrator of Anatomy.

S. G. Davis, M.D., Assistant Demonstrator of Anatomy.

Cary B. Gamble, M.D., Associate Professor of Clinical Medicine.

Glenn M. Litsinger, M.D., Demonstrator of Obstetrics.

A. Samuels, M.D., Clinical Assistant in Gynecology.

Sylvan Rosenheim, M.D., Demonstrator of Bacteriology.

This School having adopted the four years' graded course of study in 1893, is now well established on this plan.

The minimum requirement of the Association of American Medical Colleges and most State Boards of Examiners, beginning with 1898, is four full sessions of six months each in four separate years.

A biological degree from a first-class college entitles the holder to advanced standing.

Credit for one session is given to graduates of Dentistry, Pharmacy and Veterinary Surgery.

It is the aim of this School to make the Instruction, in every department, as practical as possible.

The Clinical Material is abundant, and each student obtains personal experience, and beside instruction in the Hospital Wards.

The Regular Lecture Course will begin October 1, 1904.

For further information, send for catalogue, and address

PROFESSOR CHARLES F. BEVAN, M.D., Dean,
CALVERT AND SARATOGA STREETS.
BALTIMORE, MD.
