824 Park Avenue
Baltimore, Maryland

Dear Dr. McClean:

I am writing to ask you if you would send us the Maryland State Society's list of approved schools. We discussed this at Johns Hopkins Hospital when we had our meeting, and I believe you said that you would be glad to send us a list.

Also, would you please send to me or to Mrs Kendall, who is Legislative Chairman of the Maryland Chapter of the American Physiotherapy Association, the name of the Orthopedist who gave the supposed American Physiotherapy Association examination to your members. We feel that it is very important that we take this matter up with both the Orthopedic Section of the State Medical Society as well as the National American Physiotherapy Association.

Enclosed is a copy of a letter sent to the Medical and Chirurgical Faculty. When we were informed ~~last~~ Thursday ^{April 17} that the State Medical meeting was about to be held, and since the Governor had not yet signed House Bill #69, we felt that we wanted to make one more ~~Amendment~~ ^{effort to obtain Physical Therapy Legislation through an} to the MEDICAL PRACTICE ACT. ~~Such legislation has been our objective since 1940, and, as you know, from hearing our letter of January 30th addressed to the Council of the Faculty, we were making every effort to follow through with this objective, even after legislation was inaugurated this year.~~ Such legislation has been our objective since 1940, and, as you know, from hearing our letter of January 30th addressed to the Council of the Faculty, we were making every effort to follow through with this objective, even after legislation was inaugurated this year.

Sincerely yours;

Helen C. Coburn
