

CASE 4**CASE 4 IN DETAIL**CASE 4

Students will be divided into small, discipline balanced teams to discuss the case and suggested approaches to assisting the client. Faculty will be available for consultation as the teams examine the multiple issues the case explores. The collaboration of disciplines and the sharing of expertise in approaching a plan of care will be emphasized. The session will conclude with a town meeting to discuss the case and to expand everyone's understanding of the importance each discipline plays in development of the care plan organized for the benefit of the clients discussed in the case.

4. NAVIGATING TRANSITIONS ALONG THE CARE CONTINUUM FOR FRAIL OLDER ADULTS: AN INTERDISCIPLINARY AND INTERACTIVE CASE DISCUSSION
