

ADMISSIONS, GRADUATIONS, AND ENTRANCE EDUCATIONAL QUALIFICATIONS

November 1, 1945.

To the Director or Dean of the School of Nursing:

This form is being sent to you as usual to report your 1945 admissions and graduations and the educational qualifications of your first-year students. Even though the war is over, we need this information to help in national planning during the reconversion period.

Will you please fill out and return one copy of this form to us at once. We need to have this information from every school in the country as promptly as possible and shall greatly appreciate your cooperation.

Blanche Pfefferkorn, *Director of Studies*
National League of Nursing Education

School of Nursing City..... State.....
Hospital Daily average patients 420
(excluding newborn infants)

1. a. Will you please fill in below the number of students who were admitted (including any who may no longer be in your school) each month so far during 1945 and the number, if any, you may be planning to admit during November and December.

1945	Students admitted	1945	Students admitted	1945	Students admitted
January	May	September
February	June	<u>22</u>	October	<u>41</u>
March	<u>27</u>	July	November
April	August	December

- b. Of the total students admitted from January 1 to June 30, how many were men none ?
Of the total admitted from July 1 to December 31, how many were men none ?
If the applicants had been available, what is the total number of men students you could have admitted during the year 1945 none ?
- c. Of the total students admitted during the year 1945, how many were Negro none ?
2. a. How many students will have been graduated from your school during the entire year 1945 50 ?
b. Of this number, how many will have received **only** a diploma 12+26 ? How many will have received a degree 1+11 ?
c. How many of your 1945 graduates are women all ? How many are men none ?
d. How many of your 1945 graduates are white all ? How many are Negro none ?
3. How many students do you expect to complete their course during each of the following periods in 1946:
January-June 14 ? July-December 36 ?

(over)

4. The following two tables are set up to record the amount of general education your first-year students had **before they entered your school**. Use Table A for first-year students taking the 3-year basic program leading to a diploma only. Use Table B for those students who are in the first year of either a combined 4- or 5-year program leading to a degree or a 3-year program leading to a degree. Fill in both tables if you offer both a diploma program and a degree program. **Every student in her first year should be accounted for in one or the other of these tables but never in both.** This includes your preclinical students and all of the other students in their first year.

Table A

In Table A enter the number of three-year basic program students in their first year who had each amount of general education **before entering your school**. (Count only completed years of college. A student having had one and a half years of college should be entered opposite "1 year college"). The total should be the total number of first-year students (including preclinical students) in your three-year basic program leading to a diploma only.

Table A. Students in your 3-year basic program

Completed years of education before entrance	First-year students only
H. S. graduation	
1 year college	
2 years college	
3 years college	
4 years college	
Total	

Table B

If you offer either a 4- or 5-year combined program leading to a degree or a 3-year degree program, enter any students in their first year of that program in Table B. If it is a 4- or 5-year combined program and students have completed one or two years of the collegiate part of it, even though they are in the first year of their professional course they are **not** first-year students in the combined program, and should not be included in this table. Only students in the **beginning** year of the program are first-year students.

If you have a 3-year degree program which requires 2 years of college for admission then enter those first-year students opposite 2 years of college if that is the amount of education they had **before starting your program**.

Table B. Students in your 4- or 5-year combined program or in your 3-year degree program

Completed years of education before entrance	First-year students only
H. S. graduation
1 year college
2 years college	
3 years college
4 years college
Total

Every first-year student must be accounted for in either Table A or Table B, but never in both.

Please fill out and return one copy as soon as possible to:

STUDENT AND GRADUATE NURSES IN YOUR SCHOOL

To the Director of the School of Nursing:

January 19, 1945

It is imperative that we compile information immediately concerning the number of student nurses and the number of graduate nurses now in schools of nursing. Will you please help us by filling out and returning one copy of this form at once. We need to have the information from every single school in the country.

Sincerely yours,

Blanche Pfefferkorn, Director of Studies

School of Nursing _____ City _____ State _____

Hospital _____ Daily average patients (excl. newborn) 435

1. (a) How many students were enrolled in your school on January 1, 1945 211 + 23 affiliates
