

SINI 2011

University of Maryland
Baltimore, MD
July 18, 2011

Introduction

Roy L. Simpson, RN,C, DPNAP, FAAN
Vice President, Nursing

Cerner Corporation
2800 Rockcreek Parkway
Kansas City, Missouri 64117 USA
rsimpson@cerner.com

Why Magnet Recognition matters

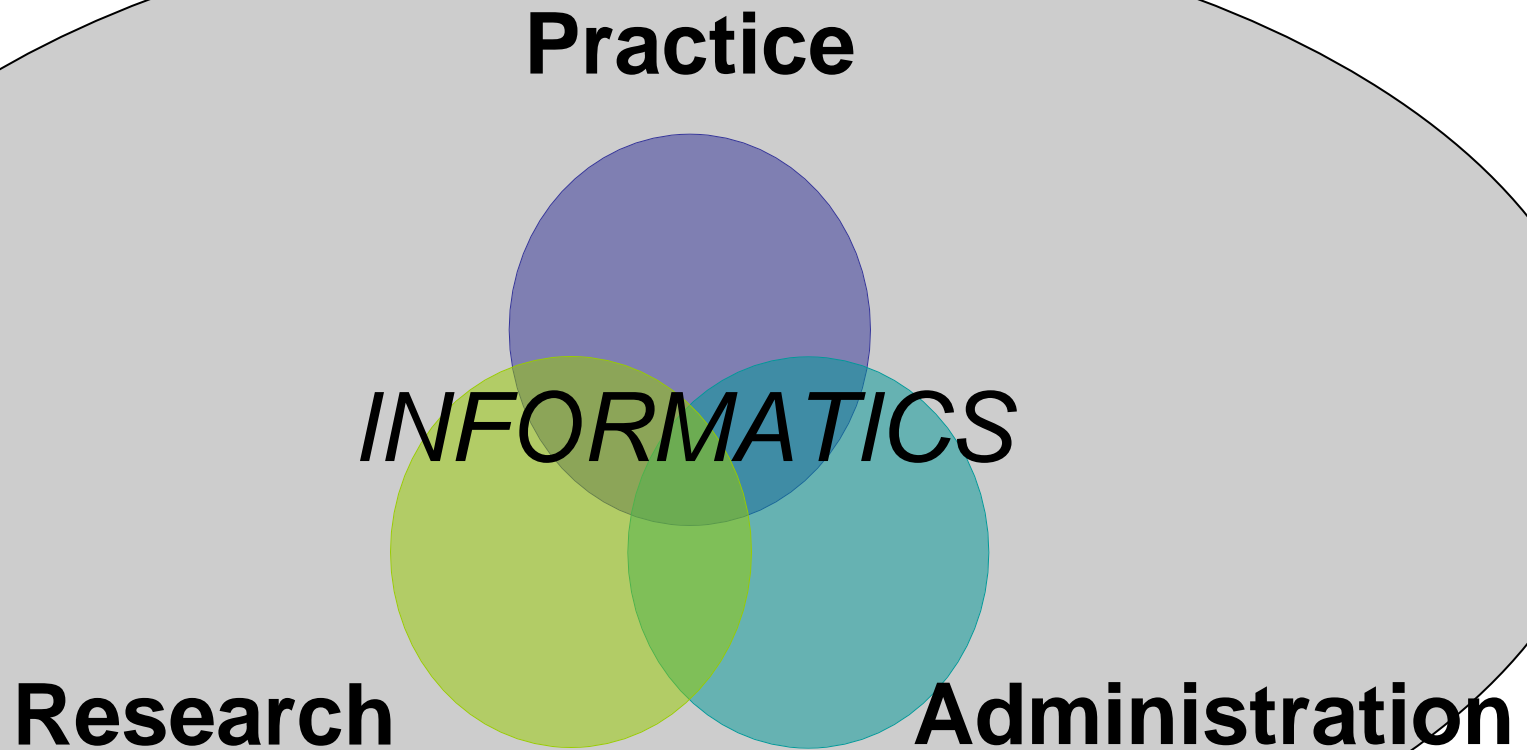

- 1. Transformational Leadership**
- 2. Structural Empowerment**
- 3. Exemplary Professional Practice**
- 4. New Knowledge, Innovation & Improvements**
- 5. Empirical Quality Results**

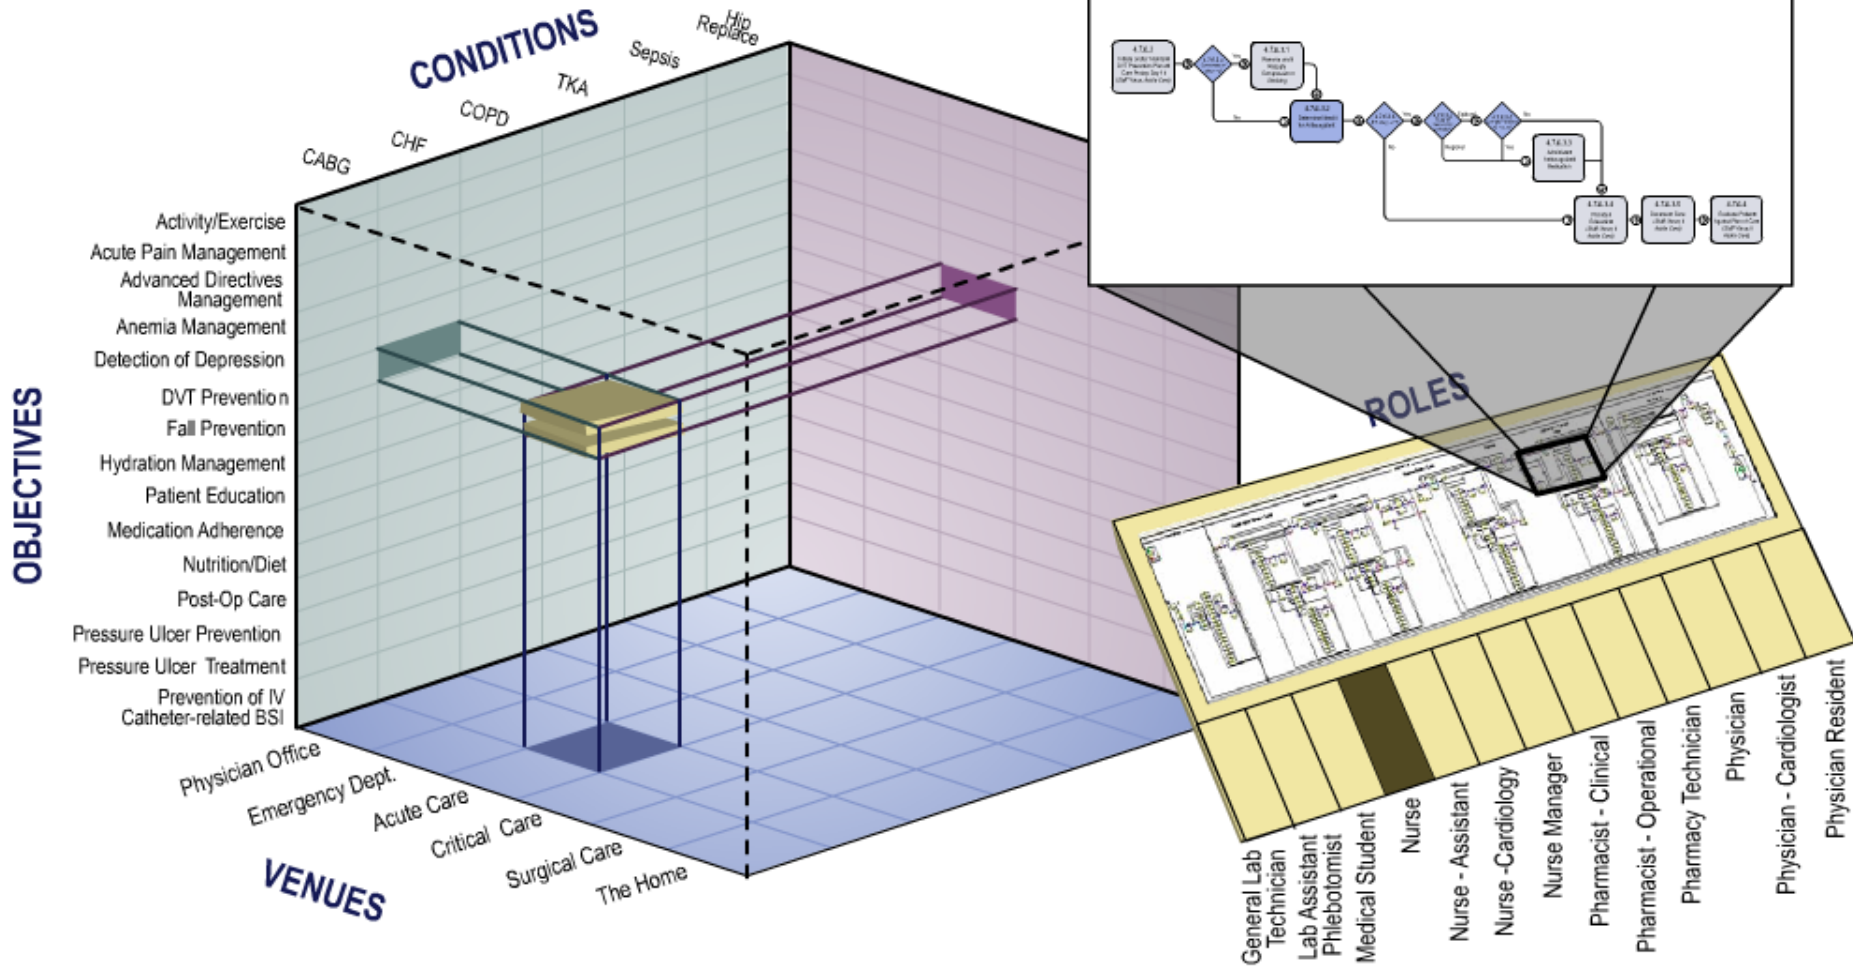

Using technology, research and professional experience to manage nursing data, information and knowledge, improve practice, and deliver better care.

(Simpson, 2009)

Informatics: Bridging knowledge bases

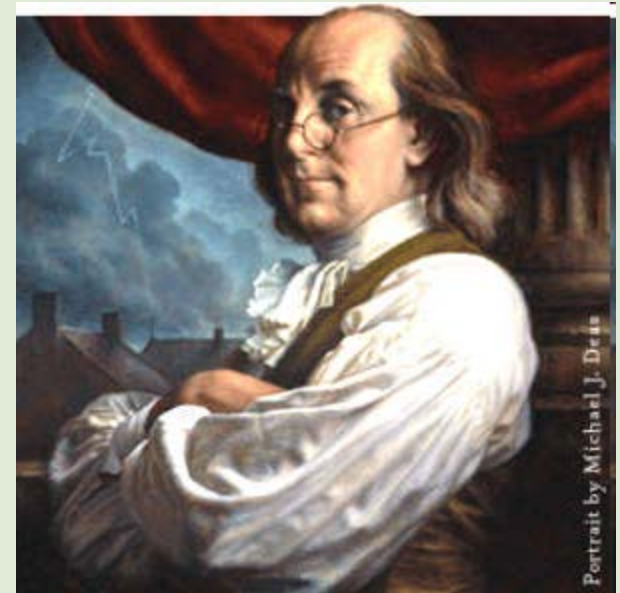

Five Dimensions for Knowledge Management to be utilized

Before Clinical IT...

**“It isn’t what you
know that counts,
it’s what you
think of in time.”**

Benjamin Franklin

Never-ending cycle of learning

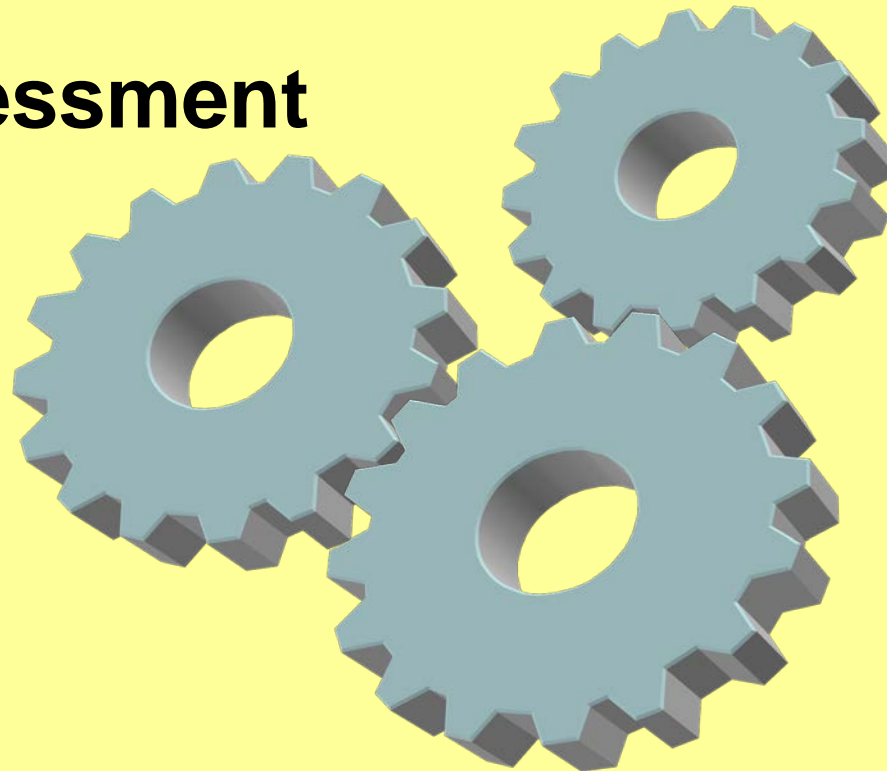

**Patient-centered systems
add context to the content of
the interaction.**

Iterative nursing process

Assessment

Interventions

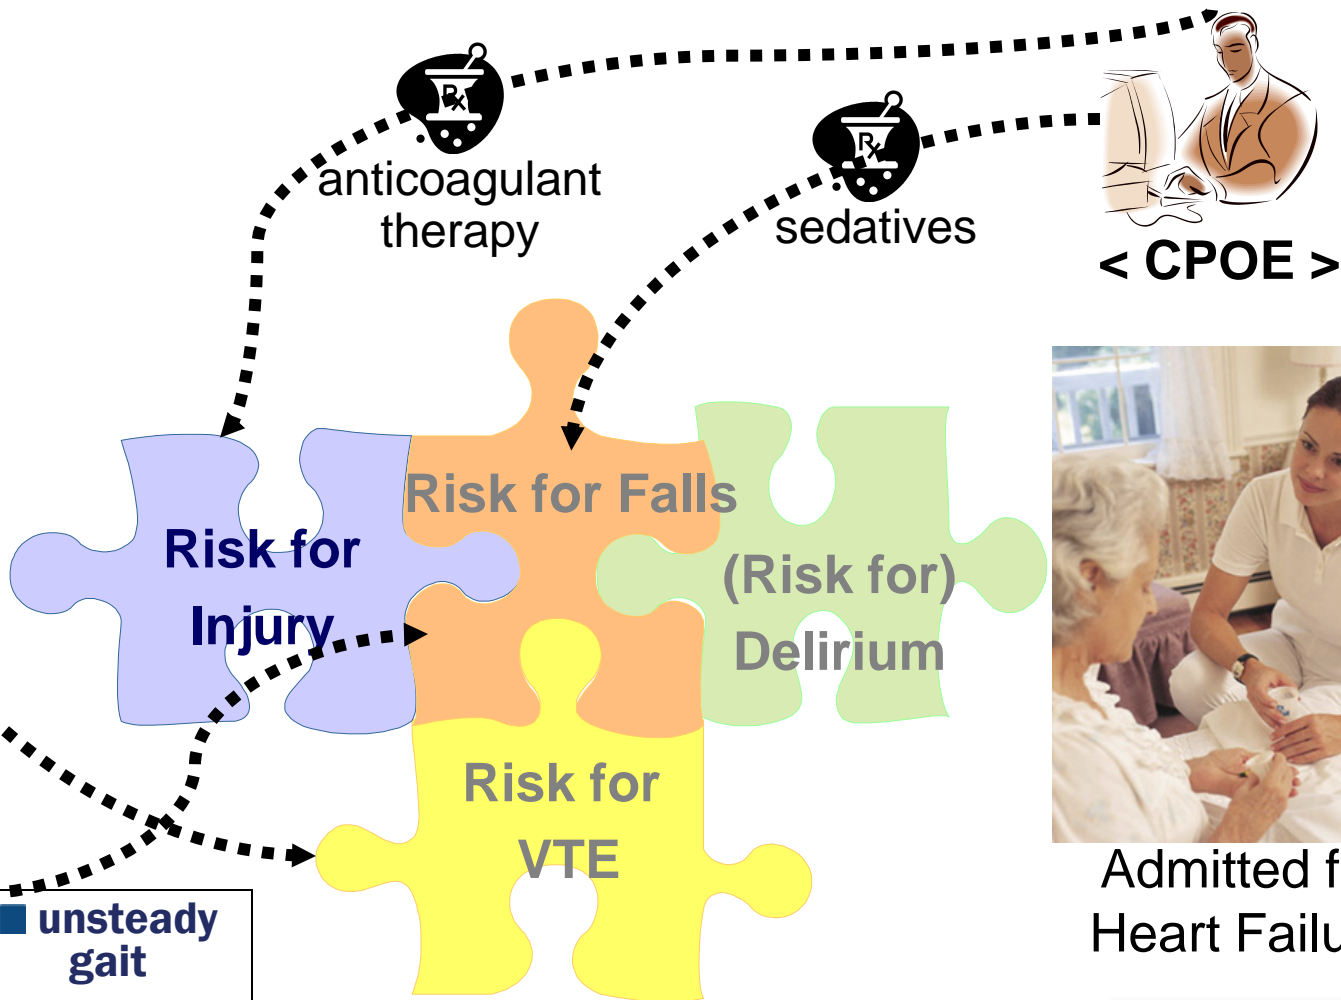

Outcomes

Evidenced-Based Interdisciplinary Planning

history of clotting disorder & mental instability

Admitted for Heart Failure

Who are we?

**Largest user
population**

**More time online
than anyone**

**Nurses outnumber
the global armed
forces**

Thank you!
