Dear Dr. O'Brien:

Thank you for providing the American Nurses Credentialing Center (ANCC) the additional information regarding your Advanced Practice Pediatric Nursing program. The information was thoroughly reviewed and the graduates of the program would be eligible to take the Pediatric Nurse Practitioner certification examination. The students who choose the tertiary emphasis would be eligible as they have received the same basic courses as the students in the other tracks of your program. The clinical to didactic hours are within the recommended ratio of one third didactic to two thirds clinical.

We look forward to your graduates applying for the ANCC certification examination for Pediatric Nurse Practitioner. Thank you for your interest in the certification programs of ANCC. If I can be of further assistance do not hesitate to contact me at 800-284-2378, ext. 7276, or 202-651-7276.

Sincerely,

A handwritten signature in black ink, appearing to read "T. J. Keefe", is written over the typed name.

Terry J. Keefe, BSN, RN  
Certification Registrar
