Re: Family Nurse Practitioner Program

It is my understanding that everything went very well in your presentation to the Maryland Board of Nursing to seek approval for the School's Family Nurse Practitioner (FNP) Specialty Track and the FNP Post-Master's program of study option.

Ann Mech said your responses to all of the questions about clinical placements, admissions qualifications of applicants and the pharmacology content were so impressive the Board approved the program without contingencies or conditions.

Congratulations and thank you for representing the School in such an exemplary manner.
