Summer 2014
Mar 12, 2015

Select the Course Number to get further detail on the course. Select the desired Schedule Type to find available classes for the course.

NDNP 801 - INNOVATION IN HEALTHCARE

3.000 Credit hours

Schedule Types: LectureSchool of Nursing Division
Nursing Department

NDNP 802 - METHODS FOR EVIDENCE-BASED PRACTICE

This course focuses on the skills and advanced knowledge necessary for critical analysis of evidence on which to base nursing practice. The students will analyze the framework to transform research into practice through the use of research outcomes, methods and planned change processes. The best practice evidence from systematic research will be applied to current health care delivery. Students will be able to apply analytical methods to develop best practices and practice guidelines and to facilitate the evaluation of systems of care that will improve patient outcomes.

3.000 Credit hours

Schedule Types: LectureSchool of Nursing Division
Nursing Department

NDNP 803 - EXEC HEALTHCARE ECON

The intense competition for resources and the demands for high quality, cost-effective care are forcing healthcare organizations to become more flexible, more outcomes-focused, and more fast-acting. Using a systems approach, this course will provide students with the foundation to understand economics within the context of the leadership role in today's healthcare organizations so that these goals can be met. First, this course will build a fundamental understanding of both micro- and macro-economic theory, and then, it will offer students the necessary tools to analyze, apply, and evaluate economic theory as it relates to healthcare delivery. Leadership theory will also be explored as part of the course, allowing the students the opportunity to reshape traditional methods of healthcare delivery in today's challenging environment.

3.000 Credit hours

Schedule Types: LectureSchool of Nursing Division
Nursing Department

NDNP 804 - THEORETICAL AND PHILOSOPHICAL FOUNDATIONS OF NURSING PRACTICE

The philosophical and scientific underpinnings of nursing reflect the complexity of practice at the doctoral level and the rich heritage that is the conceptual foundation of nursing the practice doctorate in nursing uses science-based theories and concepts to determine the nature and significance of health and health care delivery phenomena. This course integrates nursing science with knowledge from biophysical, social, and organizational sciences as the basis for the highest level of nursing practice. Students analyze selected world-views and theories from a variety of disciplines. Emphasis is placed on the refinement of critical thinking skills.

3.000 Credit hours

Schedule Types: LectureSchool of Nursing Division
Nursing Department

NDNP 805 - DESIGN AND ANALYSIS IN EVIDENCE-BASED PRACTICE

This course extends foundational competencies in research methods and design for experienced advanced practice nurses. Emphasis is on identifying appropriate design and analytical approaches to fit purposes of inquiry. Elements of inquiry are examined including: development of research questions, sampling approaches, measurement of health outcomes, collection and analysis of data, and human subjects' considerations. Common approaches to statistical analyses will be examined as well as epidemiological approaches to evaluate population health.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NDNP 806 - EXEC LEADERSHIP PRACT

3.000 Credit hours

Schedule Types: Lecture

Graduate School Division
Nursing Department

NDNP 807 - INFORMATION SYSTEMS AND TECHNOLOGY FOR THE IMPROVEMENT AND TRANSFORMATION OF HEALTH CARE

This course is designed to provide the DNP student with the knowledge and skills necessary to correctly utilize information systems and technology and to lead information systems and technology through transitions in order to improve and transform healthcare. This course will provide an advanced understanding of what currently constitutes an information technology enabled health care environment; the roles of the nurse leader and informaticist; the current state of affairs regarding information technology affecting patients and nurses within healthcare today; and leading edge issues within healthcare informatics which will impact the role of the DNP in a variety of health care settings. At the conclusion of the course, the student will have a foundation to function as an "informatics innovator" to lead the advancement of informatics practice and research; to develop solutions for current data management practices; and to demonstrate the interdependence of systems, disciplines, and outcomes.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NDNP 809 - COMPLEXHEALTH CARE ORGANIZATION

This course focuses on the analysis, synthesis and application of complexity science and quantum theory to healthcare systems. This includes the contribution of organizational theories, organizational culture, and systems' infrastructure in dynamic interplay across complex healthcare systems. The Doctor of Nursing Practice's role in creation of new and futuristic organizing frameworks is explored. As leader the students will participate in a self leadership assessment to identify their unique strengths in assuming advanced roles as leaders and followers within interdisciplinary and intra-disciplinary teams. Critique and evaluation of health systems models, and quality improvement systems are included. The dynamic influence of safety, quality, economic, financial, regulatory, policy, and ethical principles in the practice environment are addressed.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NDNP 810 - SCHOLARLY PROJECT IDENTIFICATION

In this course students become familiar with the evolution of the Doctor of Nursing Practice (DNP) and issues and trends related to the role of the DNP. They examine specific issues related to their practice that will lead them to the completion of a scholarly project at program completion. Students also meet with recent DNP graduates to identify potential electives and practicum experiences. Students will explore literature related to specific practice concerns in their area of interest to identify a focus for a scholarly project.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NDNP 811 - SCHOLARLY PROJECT DEVELOPMENT

In this course, students develop a scholarly project proposal based on an analysis of the literature. Students participate in a peer and faculty review process that provides mutual feedback and guidance on the overview, literature review and presentation of the project proposal.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NDNP 812 - SCHOLARLY PROJECT IMPLEMENTATION

In this course students execute their approved project proposal with guidance from their scholarly project and practice site advisors.

1.000 Credit hours

Schedule Types: [Lecture](#)

School of Nursing Division
Nursing Department

NDNP 813 - SCHOLARLY PROJECT EVALUATION AND DISSEMINATION

In this course Doctor of Nursing Practice (DNP) students evaluate and disseminate their approved scholarly project findings under the guidance of their scholarly project and practice site advisors. The role of the DNP as leader and innovator of complex organizational systems is discussed as it relates to the scholarly project evaluation and dissemination.

1.000 Credit hours

Schedule Types: [Lecture](#)

School of Nursing Division
Nursing Department

NDNP 815 - LEADERSHIP AND INTERPROFESSIONAL COLLABORATION

This course is based on student independent learning that emphasizes theory and practical application through working with a health care system to address inter-professional and intra-professional initiatives requiring nursing leadership at the level of a Doctor of Nursing Practice. The DNP student will demonstrate the ability to synthesize and apply theory and leadership principles to affect necessary change. The course focuses on the system dynamics as they affect highly collaborative teams and requirements for leadership. Concepts and applied experiences cover: assessment of self, synthesis and application of inter-professional and intra-professional collaborative skills, theories of effective leadership, and functions of a change manager, use of influence without authority, facilitation of teams, concepts and dynamics of communication in complexity. The synthesis and application of new leader requirements and capacity will be addressed in relation to chaos and ambiguity in a changing system, policy requirements, and the identification of value propositions.

3.000 Credit hours

Schedule Types: [Lecture](#)

School of Nursing Division
Nursing Department

NDNP 816 - SCHOLARLY PROJECT ADVISEMENT CREDIT

Doctor of Nursing Practice students have an identified practice area that will provide a guide for their plan of study. In this course students will work in conjunction with their scholarly project and clinical site advisors to develop and receive their approval for a scholarly project proposal.

1.000 Credit hours

Schedule Types: [Lecture](#)

School of Nursing Division
Nursing Department

NDNP 818 - DNP INDEPENDENT STUDY

Develops further practice or research competencies through independent study or practicum. Registration upon permission of instructor. Students may register for varying amounts of credits, ranging from one to six credits per semester.

1.000 TO 6.000 Credit hours

Schedule Types: [Independent Study](#)

School of Nursing Division
Nursing Department

NDNP 890 - DNP PRACTICUM

1.000 TO 6.000 Credit hours

Schedule Types: [Lecture](#)

School of Nursing Division
Nursing Department

NPHY 601 - CANCER GENETICS AND PATHOPHYSIOLOGY

This is the second of three courses required for completion of the Master's track for advanced practice in oncology nursing. In this course introductory material concerning the principles of cell biology, genetics and pathophysiology of cancer is followed by application of those principles to particular cancer sites. Emphasizes understanding the multiple cellular pathways that may lead to malignant transformation and the heterogeneity of cancer as a disease and as a target for therapy. Manipulation of the pathways of malignant transformation for prevention of cancer is discussed. Site-specific cancers are examined with a detailed discussion of their particular patho-physiology.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NPHY 608 - REPRODUCTION PHYSIOLOGY

Provides more extensive knowledge of human reproduction and the physiologic function of the newborn infant. Selected examples of pathophysiology are presented. Focuses on developing a scientific client assessment of needs and selecting regulatory processes for the care of clients with complex physical needs. Concepts addressed include reproduction, growth, oxygenation, circulation, motion, motility and elimination.

2.000 Credit hours
2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NPHY 612 - ADVANCED PHYSIOLOGY AND PATHOPHYSIOLOGY ACROSS THE LIFESPAN

This course provides graduate levels content of physiology and pathophysiology that is necessary for understanding the scientific basis of advanced practice nursing and for more advanced clinical courses in a variety of settings. Structural and functional changes in cells, tissues, and organs that underlie selected diseases are discussed. The student will gain an understanding of the mechanisms underlying diseases and their clinical manifestations, thus providing a basis for clinical decisions related to diagnostic tests and initiation of therapeutic regimens. Pathogenesis of disease will be related to principles of health promotion and disease prevention. The course contributes to the scientific basis for advanced practice nursing.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NPHY 614 - PHYSIOLOGY OF AGING

Emphasizes cell biology, metabolic process and cardiovascular and neurobiological aspects of aging. Presents the pathophysiological basis for health problems of older adults. Alterations at the cell, organ and system levels are discussed to provide the basis for clinical management of common health problems.

2.000 Credit hours
2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NPHY 620 - PATHOPHYSIOLOGICAL ALTERATIONS IN THE CRITICALLY ILL

Defines and describes alterations in the physiological processes commonly seen in trauma/critically ill patients and applies this theory base through supervised clinical experience in a trauma/critical care unit. Enhances assessment skills and knowledge base of pathophysiological findings.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NPHY 625 - PATHOPHYS FOR NURSE ANES

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NPHY 630 - NEONATAL AND PEDIATRIC PHYSIOLOGY

This course is designed to familiarize the student with normal physiologic adaptations and development physiology that provides the scientific basis and rationale underlying assessment and management of the neonate, infant, and child. A systems approach will be used to examine the physiologic transition to the extrauterine environment and adaptation of the infant at birth, as well as the developmental physiology of the neonate and maturation during infancy and early childhood.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NRSRG 603 - INTRODUCTION TO PHARMACOLOGY FOR NURSE ANESTHESIA

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSRG 604 - GERIATRIC IMPERATIVE MINI

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSRG 609 - ESSN PRACT GLOBAL HEALTH NRSRG

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSRG 610 - GLOBAL HEALTH

This course familiarizes students with the challenges of designing and performing gh research and practice. Students will be introduced to the scientific literature on cultural differences in health and illness, and issues of health disparities and health care and cultural competencies will be addressed. Students will begin the (optional) process of preparing to work and travel abroad by identifying potential sites and global health organizations of interest. Different programmatic opportunities will also be addressed both didactically and through presentations by faculty members and professional or graduate students who have extensive GH experience. Enrollment is open only to students in the Global Health Certificate program or by permission of instructor.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSRG 611 - GLOBAL HEALTH FIELD EXPERIENCE

Students will complete a service learning project in a GH setting under the supervision of a UM faculty member. GH certificate students have conducted field experience projects in nigeria and zambia through collaborative partnerships with the University of Maryland School of Medicine Institute of Human Virology. Preference will continue to be given to supervised group placements, though in some instances individually designed field experience projects may also be permitted pending approval by the certificate director. Although every effort will be made to identify funds for scholarship and travel support, students will be responsible for paying expenses related to participating in select field projects. Students will be required to complete a GH field experience paper and present it in a public forum following the conclusion of the field project.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSRG 624 - SPECIAL PROBLEMS OF CHILDREN WITH ACUTE, CRITICAL OR CHRONIC CARE NEEDS

This course provides complementary learning experiences for the acute/tertiary care Advanced Practice (AP) pediatric nurse practitioner student. These experiences afford the AP student the opportunity to provide advanced nursing care across the continuum of health care services to meet the specialized physiologic and psychological needs of infants, children and adolescents with complex acute, critical and/or chronic health conditions. Opportunities are provided for the refinement of skills in assessment, diagnostic reasoning and critical thinking. The emerging role of the advanced practice pediatric nurse practitioner in the acute/tertiary care setting is examined within the constraints of the health care delivery system. Concepts

regarding managed care from an organizational and administrative perspective are systematically integrated into this clinical course. Clinical settings include newborn nurseries, acute/tertiary care/managed care facilities, PICUs or specialty sites focused on the care of children with special needs and their families.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 626 - PRIMARY HEALTH CARE OF THE NEWBORN AND NEONATE

This course provides a theoretical analysis and practical approach to the advanced practice pediatric nurse practitioner's role as a provider of safe and effective care to newborns, neonates and their families. Current theories and evidenced based practice guidelines relevant to the newborn and neonate will be examined. Synthesizing data from a variety of resources, students will be provided opportunities to refine their assessment skills as well as home decision making and critical thinking abilities. The emerging role of the advanced practice pediatric nurse practitioner in the primary as well as acute/tertiary care setting in the care of this unique population is examined within the constraints of the health care delivery system. Concepts regarding managed care from an organizational and administrative perspective are integrated into this course.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 630 - ADVANCED PRIMARY CARE CLINICAL

This course will further stress application of concepts presented in the Diagnosis and Management I (NURS 620) course. The focus is on refining health assessment skills, interpreting findings, developing and implementing appropriate plans of care to meet common health maintenance needs of adults and to promote the health of adults with more complex health problems. The student will gain increased expertise in communication skills, health assessment skills, interpreting findings, epidemiological concepts and developing and implementing plans of care. The emphasis will be placed upon managing an aging population with complex, chronic healthcare needs.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 631 - INTRODUCTORY SPANISH FOR HEALTH CARE PROFESSIONAL

Students will develop basic Spanish language conversation skills for the health care setting in this small group seminar. This course will emphasize pronunciation, oral comprehension, and vocabulary for patient interviews, health education, and terminology used in clinical setting. Students will participate in seminars, small group work, case scenarios, and active practice of Spanish conversations. Students will also examine cultural considerations for the Hispanic population and integrate these elements into their developing vocabulary.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 645 - PED ACUTE CARE III CLIN PRACT

5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 646 - PEDIATRIC ADV PRACTICE ROLE

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 648 - NEWBORN AND NEONATE CLINICAL

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 663 - MINDFUL BASED STRESS REDUCTION PROGRAMS

Core course components include an overview of the evolution of Mindfulness-Based Stress Reduction Programs, a critical appraisal of the state of science in their implementation and evaluation in clinical, community and research contexts, and an opportunity to create and critique plans for implementing and evaluating MBSR programs for a variety of target populations taking into account the state of the science.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 664 - CRITICAL ISSUES IN GLOBAL HEALTH

This course provides an overview of global health problems and equips students with tools to navigate the world of international health. The course focuses on the global burden of disease and the pattern of disease variations within and among countries. It addresses issues such as poverty, environmental degradation, and the impact of globalization on health. Topics covered include maternal and child health, gender and violence, nutrition, water, and sanitation.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Behavioral & Community Health Department

NRSG 668 - DIFF DIAGNOSIS/PSYCHOPATHOLOGY

“Differential Diagnosis of Mental Disorders across the Lifespan” provides students with the knowledge and skill to perform advanced clinical assessment of mental disorders using the DSM-IV. The course emphasizes a multidimensional approach to assessment that integrates behavioral and social data into a comprehensive clinical evaluation of behavioral dysfunction and mental disorders, with appropriate recommendations for treatment of individuals across the life span. The course incorporates the use and interpretation of psychological behavioral scales, laboratory tests, observational and interview data integrated with the latest scientific knowledge about the biopsychological and socio-cultural dimensions of mental disorders.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 669 - DIFFERENTIAL DIAGNOSIS OF MENTAL DISORDERS PRACTICUM

“Differential Diagnosis of Mental Disorders across the Lifespan: Practicum” provides students with the opportunity to practice advanced interviewing and assessment skills with persons with mental disorders in a variety of psychiatric settings. Students are encouraged to select settings appropriate to their focus of study (adult, geriatric, child and adolescent). Under the supervision of clinical preceptors, students will conduct diagnostic interviews, make DSM-IV-TR diagnoses and formulate plane of care.

2.000 Credit hours

Schedule Types: Clinical

School of Nursing Division
Nursing Department

NRSG 670 - ADVANCED ANESTHESIA NURSING SEMINAR I

This anesthesia course is the first of two designed to integrate the didactic curriculum with several semesters of clinical anesthesia practice. Student Registered Nurse Anesthetists (SRNAs) will review the practice of nurse anesthesia using current information and resources reflecting the standards of practice in the field of nurse anesthesia. Emphasis will be placed on a case study approach following body systems for surgical procedures and specific influences of physiology and pathophysiology on anesthetic management.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

Nursing Department

NRSNG 709 - MANAGEMENT OF THE WELL CHILD AND ADOLESCENT IN THE PRIMARY CARE SETTING

This is the first course in the Advanced Practice Pediatric Nurse Practitioner educational program. The purpose of this course is to provide beginning preparation for the student to assume the role of primary care provider and role collaboration in the provision of quality ambulatory pediatric health care. It presents in-depth analysis of theories and behaviors relevant to the health promotion and health maintenance of the infant, child and adolescent. The uniqueness and importance of developmental assessment, developmental surveillance and utilization of growth parameters will be highlighted. Students are expected to actively participate in examining developmental, family, and maturational theories of child and adolescent development. Communication and assessment skills, developing case management, and implementing and evaluating strategies to promote emotional, cognitive and physical health of infants, children and adolescents are emphasized.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSNG 713 - COMMON HEALTH PROBLEMS OF CHILDREN AND ADOLESCENTS 1

This course prepares the student to identify disruptions in the physical, cognitive, and personal expressions of health of children from birth to twenty years of age. The emphasis is on developing a knowledge base of pathophysiological and psychopathological processes. Special consideration is given to the effects of health problems on the growth and development of the child. Emphasized will be epidemiology, differential problem solving, and selection of regulatory processes, specific therapeutic measures, and management strategies including primary and secondary prevention.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSNG 715 - PED PRIM CARE IV CLIN PRACT

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSNG 716 - PRIMARY CARE CLINICAL 1

This course provides beginning preparation for the APN student to assume the role of a primary care provider who contributes to and supports the collaborative responsibility, with other members of the health team, for providing quality ambulatory pediatric health services. Communication, assessment skills, and implementing and evaluating strategies to promote emotional, cognitive and physical health of infants, children and adolescent will be applied. Emphasis is placed on preventative care in the well child to identification of pediatric health related disruptions in the physical, cognitive, and psycho-social domains. The development and refinement of a knowledge base of pathophysiological and psychopathological processes is emphasized as well. Clinical experiences will focus upon primary care settings such as school-based clinics/wellness centers, health

maintenance organizations, outpatient pediatric clinics and private practices.

Nursing Department

NRSG 720 - CHANGING WORLD INFORMATICS HEALTHCARE

This course focuses on the rapid changes in information technology, informatics theory and policy that irrevocably reshape healthcare delivery practice and research. The course examines current trends in the changing world of informatics and technology as they pertain to nursing and healthcare. We review and present the most recent and important developments in informatics, particularly focusing on software, hardware, research, and policy that impact healthcare practice and outcomes. The course studies developments in informatics in relationship to the motivators of policy/politics, technology, economics, and consumers.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NRSG 721 - PRIMARY CARE CHRONIC ILLNESS

This course provides essential preparation for the Advanced Practice PNP student in the provision of care to infants, children and adolescents with chronic illness or special care needs. A holistic healthcare approach is the underlying theme in promoting and maintaining the health and developmental needs of these children and is viewed essential to their care. Developing a knowledge base of physiology and pathophysiological processes is emphasized. Case management, assessing and documenting effectiveness of treatment plans and providing cost effective care is discussed. Education, support, advocacy and health promotion is integrated into the discussion as well as anticipatory guidance. Barriers to optimal health care for these children are identified and the role of the advanced practice nurse in assuming leadership in the care of these children is discussed.

2.000 Credit hours

Nursing Department

NRSG 722 - PRIMARY CARE CLINICAL II

Primary Care Clinical II is taught in conjunction with NRSG N721. This course provides essential preparation for the Advanced Practice PNP Primary Care student in the provision of care to infants, children and adolescents with chronic illness or special care needs. A holistic healthcare approach is the underlying theme in promoting and maintaining the health and developmental needs of these children. Communication, assessment skills, and implementing and evaluating strategies to promote emotional, cognitive and physical health of this cohort population are explored. Emphasis is placed on case management, assessing and documenting effectiveness of treatment plans and providing cost effective care. Special consideration is given to the consequences of health problems on the growth and development of this unique population. Opportunities are provided for developing and enhancing skills in assessment, diagnostic reasoning and critical thinking. Clinical experiences will focus upon settings unique to this population of children. Examples include health maintenance organizations, outpatient pediatric clinics rehabilitation centers and private practices.

NRSNG 782 - HEALTH SYS POL LDRSHP QUAL

This core course is designed to provide an analysis of health care delivery and policy trends and their effects on organization of

clinical and health systems. The course investigates the policy, regulatory, financial, technological and social dynamics that lead to quality improvement and patient safety impacting health care organizations, health care professionals, and patient populations. Leadership strategies are explored that influence decisions at both the practice-level and systems-level. Emphasis is placed on the role of nurses in developing and implementing initiatives to improve quality and cost-effectiveness of care and demonstrate sensitivity to diverse organizational cultures and populations.

NURS 300 - NUTRITION

Introduces students to the concepts of normal nutrition so that they may build upon this knowledge when working with clients and patients in health care settings. Satisfies the prerequisite basic nutrition course required of all students before entering the undergraduate program at the University of Maryland School of Nursing.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 304 - INTRO TO PROF NURSING PRACTICE

This didactic, laboratory, clinical and seminar course introduces students to the concepts of contemporary professional nursing. The student is guided in the application of theory to clinical practice and in the development of cognitive, psychomotor, communication, and therapeutic skills necessary to address the common needs and responses of persons experiencing various health states.

0.000 OR 4.000 Credit hours

Schedule Types: Lab, Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 308 - NURSING CARE INFANTS CHILDREN

This course teaches students how to provide nursing care to infants and children within the family as a unit of care. An integrated approach to development is used. Emphasis is placed on understanding the family as the basic unit in children's lives. Biological, psychological, social, cultural, and spiritual influences that impact family beliefs are emphasized. Content includes a focus on wellness and illness. Current pediatric health problems, anticipatory guidance, prevention and health care promotion are presented within a framework of childhood development, family dynamics and communication skills. By using the nursing process and fostering critical thinking, the student will learn to deliver safe, theory-based nursing care to children within the family unit. Clinical experiences with children and their families provide opportunities for application and integration of theory-based content. Students participate in clinical experiences in a variety of settings including acute care facilities, the community, and the learning resource center. Students will care for families with children experiencing both simple and complex needs throughout various stages of the life span. Opportunities will be provided for students to learn specific content on an individual basis through the medium of computer-assisted instruction, interactive videos, films, and through access to the multimedia skills laboratory.

0.000 OR 4.000 Credit hours

4.000 Lecture hours

NURS 309 - HEALTH OF DIVERSE POPULATIONS

Enables students to develop a philosophy and definition of health that takes into account the multiple health care needs of and relationships among populations, communities, families and individuals. Using the components of the nursing process, students learning introductory methods to assess the health status of populations, communities, families and individuals.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Behavioral & Community Health Department

NURS 311 - PATHOPHYSIOLOGY

Focuses on pathophysiological disruptions to system functioning. The alterations within the system are discussed as well as the impact of these alterations on the individual. The student applies previously acquired knowledge in human anatomy and physiology as well as other sciences. This course contributes to the scientific basis for use of the nursing process.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 312 - PHARMACOLOGY

Explores the use of therapeutic drugs in the health care setting and their effects upon normal and abnormal physiology. Pharmacologic agents are discussed in relation to their effects on body systems, mechanism of action and excretion, therapeutic usage and nursing implications. The course builds upon the student's understanding of physiological and pathophysiological processes.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 315 - PATHOPHARMACOLOGY

This course focuses on the disruptions of physiological systems that immediately or ultimately produce disease states and on the use of drugs to prevent or ameliorate those disruptions. Patient and population specific factors that affect the likelihood of success of a particular drug therapy or that increase the danger from untoward effects are integrated throughout the course. Legal and regulatory issues are discussed. The student applies previously acquired knowledge in human anatomy and physiology as well as other basic sciences.

Organizational Syst & Adult Hlth Department

NURS 320 - SCIENCE RESEARCH NURS PRAC

This course addresses the research-related knowledge, skills, and attitudes necessary to meet the minimal research-related role expectations of baccalaureate-prepared nurses. Role expectations and resultant course content and learning strategies address (a) the basic elements of research and their interdependence, (b) the critique of nursing and related health care research, (c) incorporation of research and related theoretical perspectives into clinical practice through the processes of research utilization and approaches to evidence-based practice, and (d) adherence to ethical guidelines in research-related endeavors.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 325 - CONTEXT HEALTH I

This course provides an overview of the nature of nursing as an evolving profession and its relationship to the structure and function of the United States health care delivery system. Major issues and trends in nursing and health care are explored. Consideration is given to the impact of social, political, economic, and technological factors on the health care system and the nursing profession. The development of basic skills and competencies in problem-solving, decision-making, group dynamics, delegation and supervision are addressed.

2.000 Credit hours

2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 330 - ADULT HEALTH NURSING

This course provides didactic and clinical learning experiences designed to enable students to provide nursing care to clients across the adult life span who are experiencing a variety of complex, acute, and chronic health problems in various settings, including long-term care and/or rehabilitation.

0.000 OR 7.000 Credit hours

7.000 Lecture hours

0.000 Lab hours

0.000 Other hours

Schedule Types: Clinical, Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 331 - GERONTOLOGICAL NURSING

This course explores unique health and nursing needs of elderly clients and their significant others, and examines the political, social, economic, ethical, and end of life issues that have implications for an aging society. The emphasis will be on healthy aging and wellness and for the student to develop a positive perspective on aging.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 333 - HEALTH ASSESSMENT

This course is designed to provide students with the knowledge and skills necessary to assess individual health as a multi-dimensional, balanced expression of bio-psycho-social-cultural well-being. Course content will reflect a functional health and systems approach to nursing assessment of humans through all developmental stages. Comprehensive bio-psycho-social-cultural assessment approaches will be introduced to enable students to assess the impact of environmental influences (risk factors) upon individual health.

0.000 OR 3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lab, Lecture

School of Nursing Division

Organizational Syst & Adult Hlth Department

NURS 402 - PSYC MENTAL HEALTH NURSING

This course provides a basic understanding of psychiatric and mental health nursing principles through classroom and related clinical experiences in a variety of settings. Course content builds on the American Nurses Association's Psychiatric & Mental Health: Scope and Standards of Practice using an integrated biological, psychological, sociocultural, environmental, and spiritual approach to the care of persons with psychiatric disorders. Empirical, aesthetic, ethical and personal ways of knowing are explored as a basis for understanding the holistic needs of persons with psychiatric disorders. Current research, theory, and biological foundations of psychiatric disorders are introduced. Treatment modalities and legal/ethical implications of caring for persons with psychiatric disorders, along with issues of professional and personal involvement in psychiatric mental health nursing, are discussed. The therapeutic use of self within the context of an integrated, evidence-based approach to meeting the biological, psychological, cultural, social, and spiritual needs of persons with psychiatric disorders, their families, and caregivers is emphasized.

0.000 OR 5.000 Credit hours

0.000 Lab hours

0.000 Other hours

Schedule Types: Clinical, Lecture

School of Nursing Division
Family and Community Health Department

NURS 403 - COMMUNITY HEALTH NURSING

This course uses a public health nursing practice model that links nursing with core public health functions and essential public health services. It provides the foundational principles of community and public health nursing using theory, analytic skills, and related clinical experiences. Global, federal, state, and local public health priorities are examined to illustrate the nursing process for the care of communities and populations. The sciences providing the evidence base for community and public health assessment, intervention, and evaluation are integrated into the course. Ethical principles and concepts of occupational and environmental health and social justice are incorporated by analyzing the origins of health disparities especially in cases of special (vulnerable) populations. The historical, current, and future role of nurses, who care for populations by empowering individuals, families, and communities, is critically analyzed. Students apply and evaluate evidence-based interventions in a variety of public and private clinical settings.

School of Nursing Division
Family and Community Health Department

NURS 405 - INFORMATICS AND TECHNOLOGY

This course introduces students to informatics as it applies to health care in general and nursing practice in particular. The course consists of several modules in which students learn about the theoretical perspectives related to the flow of information in health care; concepts of data, information, and knowledge; language models and concepts; technologies and their applications to nursing care; and the electronic health record in its many forms. The course introduces and discusses public and institutional policies important to health care technology, communication, and documentation of health care interventions, with an emphasis on privacy, confidentiality, and security. Finally, the course will address technology issues important to the future of nursing and health care.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 407 - MATERNAL AND CHILD NURSING

This clinical course provides an understanding of perinatal, women, and family nursing principles through classroom and seminar experiences. An evidence-based practice approach is used and emphasis is placed on the biological, psychological, social, cultural, and spiritual aspects of the childbearing experience. Course content includes patient centered care and examination of selected societal and technological issues that influence women and families. Students will apply theory into clinical practice through nursing care experiences with women, newborns, and families in a variety of inpatient and outpatient settings.

0.000 OR 5.000 Credit hours

NURS 425 - ORGANIZATIONAL LEADERSHIP

This course focuses on the leadership roles and the management functions of professional nurses in a contemporary health care environment. Organizational, economic, regulatory, and interpersonal factors that impact nursing practice are explored. The administrative process is utilized as a framework to examine management and leadership concepts and principles such as planning, organizational analysis, conflict management, quality improvement, and fundamental fiscal issues, among others. The integration of management theory and the social responsibility of the nursing profession are emphasized.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 427 - CLINICAL EMPHASIS SEMINAR

Enables the student to focus on an area of clinical interest. Major characteristics of the clinical specialty such as the types of clients/patients, types of diseases/ disorders/common problems, preventive aspects, special knowledge and skills needed and available resources are explored.

1.000 Credit hours

1.000 Lecture hours

Schedule Types: Lecture/Clinical

School of Nursing Division
Nursing Department

NURS 487 - CLIN EMPHASIS PRAC AND SEM

This course is the capstone clinical practicum and seminar taken in the final semester of the baccalaureate program to facilitate the transition from nursing student to professional nurse. Analysis and synthesis of information from all NURS 425 coursework is applied to the delivery of organized and safe nursing care in a variety of clinical situations. The components of the course are the clinical preceptorship, critical thinking, and career planning. The course is designed to provide the student with opportunities to apply knowledge from nursing courses and critical thinking skills to clinical situations and case studies. The student works with a clinical preceptor in the development, implementation, and evaluation of objectives specific to the clinical emphasis area. Students will revise and refine their resume and interviewing skills and develop an individualized plan for preparing for the NCLEX examination. This course is taken during the last semester of the program.

6.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 501 - PATHOPHYSIOLOGICAL AND PHARMACOLOGICAL BASES FOR NURSING PRACTICE

This course focuses on the pathophysiologic disruption to system functioning and on the use of therapeutic drugs in the health care setting. This course will provide an understanding of the Therapeutic Experiment and the role of the nurse in managing drug therapy. The student applies previously acquired knowledge in human anatomy and physiology as well as other basic sciences. The course contributes to the scientific basis for nursing practice.

5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 503 - HEALTH ASSESSMENT

This course is designed to provide the nursing student with the knowledge and skills necessary to assess individual health as a multi-dimensional expression of bio-psycho-social-cultural well being. Course content will reflect a functional health and systems approach to nursing assessment of humans through all developmental stages.

0.000 OR 3.000 Credit hours

Schedule Types: Lab, Lecture

School of Nursing Division
Nursing Department

NURS 505 - INTRODUCTION TO PROFESSIONAL NURSING PRACTICE

This didactic, laboratory, clinical and seminar course introduces students to the concepts of contemporary professional nursing. The student is guided in the application of theory to clinical practice and in the development of cognitive, psychomotor, communication, and therapeutic skills necessary to address common needs and responses of persons experiencing various health states.

0.000 OR 4.000 Credit hours

Schedule Types: Lab, Lecture

School of Nursing Division
Nursing Department

NURS 507 - INTRODUCTION TO NURSING AND THE CNL ROLE

This course provides an overview of the nature of nursing as an evolving profession and its relationship to the structure and function of the United States health care delivery system. Major issues and trends in nursing and health care are explored. Consideration is given to the impact of social, political, economic, and technological factors on the health care system and the nursing profession. The development of basic skills and competencies in problem-solving, decision-making, group dynamics, delegation and supervision are addressed.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 508 - COMMUNITY/PUBLIC HEALTH NURSING FOR THE CLINICAL NURSE LEADER

'Community/Public Health Nursing for the Clinical Nurse Leader' provides the foundational principles of community and public health nursing using theory, analytics skills, and related clinical experiences. Global, federal, state, and local public health priorities and policy options are examined to illustrate the nursing process for the care of communities and population. The sciences providing the evidence base for community and public health assessment, intervention, and evaluation are integrated into the course. These include introductory epidemiology; community based participatory research (including cultural awareness and competence), nursing, and social sciences and qualitative methods. Ethical principles and concepts of social justice are incorporated by analyzing the origins of health disparities especially in cases of special (vulnerable) populations. The U.S. public health system is analyzed relative to the Alma Ata Declaration, U.S. health goals, local emergency preparedness, populations' access to care, and cost. The historical, current, and future role of nurses who care for populations by empowering individuals, families, and communities is critically analyzed. Students apply evidence-based interventions in a variety of public and private clinical settings.

0.000 OR 5.000 Credit hours

3.000 Lecture hours

2.000 Other hours

Schedule Types: Clinical, Lecture

School of Nursing Division
Family and Community Health Department

NURS 509 - THE CHILDBEARING FAMILY FOR THE CLINICAL NURSE LEADER

This course provides an understanding of prenatal, women and family nursing principles through classroom and seminar experiences. Course content builds on the Association of Women's Health, Obstetric, and Neonatal Nurses' Standards and Guidelines and the American Association of Colleges of Nursing Clinical Nurse Leader (CNL) role delineation. An evidence-based

practice approach is used and emphasis is placed on the biological, psychological, social, cultural, and spiritual aspects of the childbearing experience. Course content includes patient centered care and examination of the societal and technological issues that influence women and childbearing families. Students will apply theory into clinical practice through nursing care experiences with antepartal, intrapartal, and postpartum families in a variety of inpatient and outpatient settings.

0.000 OR 5.000 Credit hours

3.000 Lecture hours

School of Nursing Division
Family and Community Health Department

NURS 511 - PSYCHIATRIC MENTAL HEALTH NURSING FOR THE CLINICAL NURSE LEADER

This course provides an understanding of psychiatric and mental health nursing principles through classroom and related clinical experiences in a variety of settings. Course content builds on the American Nurses Association's of Colleges of Nursing Clinical Nurse Leader (CNL) role delineation. Using an integrated biological, psychological, sociocultural, environmental, and spiritual approach, students will learn interventions for the care of individuals and groups with psychiatric disorders. Empirical, aesthetic, ethical, and personal ways of knowing are explored as a basis for understanding the holistic needs of persons with psychiatric disorders. Current research, theory, and biological foundations of psychiatric disorders are introduced. Evidence-based interventions, issues of professional and personal involvement in psychiatric mental health nursing, and legal and ethical implications of caring for persons with psychiatric disorders are discussed. The course requires the clinical application of communication, interpersonal, crisis intervention, cognitive behavioral, and motivational interviewing theory and skills. Students apply psychopharmacological principles, critical thinking, patient education skills, support, advocacy and caring in the clinical setting. The therapeutic use of self and the leadership role of the CNL are emphasized. The course provides opportunities for students to learn to function as beginning CNLs in the roles of professional, clinician, outcomes manager, advocate, educator, and life-long learner.

0.000 OR 5.000 Credit hours

Schedule Types: [Clinical](#), [Lecture](#)

School of Nursing Division
Nursing Department

NURS 514 - ADULT HEALTH NURSING FOR CLINICAL NURSE LEADER

This course is designed to introduce clinical nurse leader students to the application of the nursing process for clients in acute care settings. Topics fundamental to the provision of client-centered nursing care in the adult acute care environment will be covered. Lectures, discussion, and clinical application will be used to address topics relevant to beginning nursing practices as a clinical nurse leader.

0.000 OR 6.000 Credit hours

Schedule Types: [Clinical](#), [Lecture](#)

School of Nursing Division
Nursing Department

NURS 517 - NURSING CARE OF INFANTS AND CHILDREN: FAMILY PERSPECTIVE

'Nursing Care of Infants and Children: A Family Perspective' provides an understanding of how family-centered atraumatic care in the pediatric setting facilitates the health and well-being of infants, children, and adolescents. Course content builds on the American Nursing Association Standards of Maternal and Child Health Practice, American Nursing Association Standards for Practice, and the American Association of Colleges of Nursing clinical nurse leader (CNL) role delineation. The role of the pediatric nurse in the provision of therapeutic relationships, family advocacy, disease prevention/health promotion, anticipatory guidance, support/counseling, and health restoration is explored. The biological, psychological, social, cultural, and spiritual aspects of the child within the context of the family unit are examined. The strength and the competence of the family are enhanced through emphasis on the development of mutuality and partnerships between the pediatric nurse and the parents. Current pediatric health issues related to wellness and illness are examined utilizing an evidence-based practice approach. Clinical experiences will afford the CNL student the opportunity to provide nursing care across the continuum of pediatric health care services meeting the physical and psychological needs of infants, children, and adolescents in primary, acute, critical, and chronic care settings. Opportunities are provided through a variety of clinical experience for the development and refinement of assessment skills, critical thinking, and problem-solving skills as well as nursing intervention strategies.

0.000 OR 4.000 Credit hours

[All Sections for this Course](#)

School of Nursing Division
Nursing Department

NURS 523 - CLINICAL NURSE LEADER EMPHASIS PRACTICUM

This course is the capstone clinical practicum and seminar taken in the final semester of the Clinical Nurse Leadership program of study to facilitate the transition from nursing student to clinical nurse leader. Analysis and synthesis of information from all coursework is applied to the delivery of organized, safe, efficient, outcomes oriented nursing care in a variety of clinical situations. The components of the course are the clinical and leadership preceptorship, critical thinking, and career planning. The course provides the student with opportunities to apply knowledge from nursing courses (they may also apply previous

knowledge from other spheres) and critical thinking skills to clinical situations, patient care leadership, and case studies. The student works with a clinical preceptor to develop, implement and evaluate objectives specific to the clinical patient care and leadership in the emphasis area.

8.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 525 - LEADERSHIP IN CLINICAL NURSING PRACTICE

This course focuses on the leadership roles and management functions expected of the clinical nurse leader in a contemporary healthcare environment. Organizational, economic, regulatory and interpersonal factors that impact nursing practice are explored. The administrative process is emphasized as a framework for analyzing concepts and principles such as system theory, fiscal principles, quality improvement methodologies, planned change and the principle attributes of professionalism, among others. Stress is placed on the development of critical thinking skills and the identification of nursing leadership and research implications. The integration of leadership and management theory and the social responsibility of the nursing profession are emphasized.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 602 - PLANNING HEALTH CARE FOR POPULATIONS

Provides selected conceptual and contextual frameworks needed by advanced practice nurses in the delivery of health care services to populations in an evolving health care system. Introduces a variety of theories and models for managing health care of populations from a population perspective. Involves a wide range of learning activities including using quantitative and qualitative epidemiological methods related to health indicators and accessing relevant health databases for health care planning purposes. Planning concepts and quality indicators needed to effect changes in the health status of selected populations provide practice applications. Cultural determinants of care are also addressed.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 603 - NURS IN MASS CASUALTY EVENTS

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 604 - PHARMACOLOGY OF ANESTHESIA NURSING

This course will provide a comprehensive understanding of the pharmacology of the inhalation anesthetics. The principles of uptake and distribution (pharmacokinetics) of inhalation anesthetics will be discussed along with factors (e.g., flow rates, co administration of N₂O, and variations in CO) that can influence the rate of rise of alveolar tension. This course will also cover the Pharmacokinetics and Pharmacodynamics of intravenous anesthesia drugs.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 605 - HEALTH ASSESSMENT ACROSS THE LIFESPAN

Builds on previously learned skills and knowledge to develop advanced skills in obtaining and completing a comprehensive health history and physical, and develop competence in identifying, describing and communicating normal and abnormal findings in a written and oral format. A major focus of this course is on the assessment process. Course section prerequisites may differ.

0.000 OR 3.000 Credit hours

3.000 Lab hours

Schedule Types: Clinical, Lecture

School of Nursing Division
Nursing Department

NURS 606 - SYST IN HEALTH CARE DELIVERY

Provides a systems-level analysis of health care policy trends and their effects on organizations and delivery systems, as well as provider and consumer roles in health care delivery. Investigates policy and societal trends affecting health care, the nursing profession and nursing practice. Analyzes health care delivery systems responding to rapidly changing financial incentives that influence the industry at the community, state, national and international levels. Assesses the dynamics of these changes on the roles of health care providers and consumers from the economic, social, organizational, political, ethical, legal and technological perspectives. Examines nursing roles and leadership strategies for influencing policy decisions. Emphasis is placed on nursing's role in affecting the health care environment and on the effects of external forces on advanced practice roles and the profession.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Organizational Syst & Adult Hlth Department

NURS 608 - SPECIAL PROBLEMS IN NURSING

Provides for alternative learning experiences: independent study, development of specific clinical competencies, classes focusing on a variety of special interest topics or topics of an interdepartmental nature. Registration requires permission of advisor. Students may register for one to three credits per semester with a maximum of six credits per degree.

1.000 TO 6.000 Credit hours

1.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Family and Community Health Department

NURS 609 - CRITICAL ISSUES IN HEALTH CARE

Enables an interdisciplinary group of students to examine the policy, legal and ethical components of a variety of critical issues in health care delivery. Several teaching techniques, including case studies, simulations, mock hearings and panel discussions are used to explore such topics as medical malpractice, rights of patients to refuse treatment, informed consent and substituted consent in medical decision-making, regulation of experimental drugs, cost containment in the health care system and delivery of health care to the poor and indigent. The course is taught by faculty from a variety of disciplines, including law, philosophy, nursing, medicine, dentistry, pharmacy, social work and economics.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 610 - PHARMACOLOGY OF ANESTHESIA NURSING II

This course is a continuation of the study of concepts developed in Pharmacology of Anesthesia Nursing I. In this second semester course emphasis is placed on the study of the uptake, distribution, and biotransformation of anesthetic drugs. The course will also provide information on anesthesia drugs used in clinical specialty areas such as obstetric and pediatric anesthesia and local anesthetics.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 611 - PEDIATRIC ASSESSMENT IN ADVANCED PRACTICE NURSING

Utilizes a seminar alternating with laboratory and clinical experiences that emphasize the role of the advanced practice pediatric nurse. Provides the opportunity to refine assessment skills as data is collected and analyzed in the clinical area, using a variety of interviewing, examining and recording skills. Role boundaries, role facilitation and barriers to role implementation are analyzed in seminar sessions.

3.000 Credit hours

2.000 Lecture hours

1.000 Other hours

Schedule Types: Lecture

School of Nursing Division

Family and Community Health Department

NURS 612 - TRENDS AND ISSUES IN WOMEN'S HEALTH CARE

Focuses on the evolution of women's health as a discipline and the importance of examining gender-related differences.

Discussions include cultural, psychological, social, economical, legal and biological determinants of health and well being of adolescents and women throughout the life span.

2.000 Credit hours

2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Child, Women's & Family Health Department

NURS 613 - PRINCIPLES OF ANESTHESIA NURSING I

This course provides introductory information pertinent to the clinical practice of anesthesia. Students will build on their previous critical care clinical experience to develop advanced and essential information on providing pre-anesthesia, intra-anesthesia, and post-anesthesia patient care. Emphasis is on basic information in nurse anesthesia about the induction, maintenance, and emergence from anesthesia to include monitoring, patient positioning, and anesthesia record keeping. Additionally, students will build on previously learned skills and knowledge to develop advanced skills in obtaining and completing a comprehensive pre-operative health history and physical. This will allow the student to develop competence in identifying, describing and communicating normal and abnormal assessment findings in written and oral format and using this information to develop an anesthesia plan of care.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 614 - PRINCIPLES OF ANESTHESIA NURSING II

This course is designed to further explore and develop concepts taught in principles of Anesthesia Nursing I with an emphasis on the anesthetic management of the pediatric, geriatric and obstetrical patient. The student will review the specific anesthetic needs, unique physiological requirements and specific safety issues for each specialty. Students will learn to modify their standard anesthesia techniques for health adult patients to address the safety issues and unique needs of these groups.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 615 - REGIONAL ANESTHESIA

This course is designed to provide the anesthesia student with knowledge of the anatomy, physiology, pharmacology and clinical aspects of the administration and management of regional anesthesia. The course will review neurophysiology and anatomy, pharmacology of local anesthetics, safety requirements and precautions and contraindications to regional anesthesia as well as correct documentation of regional anesthesia administration and maintenance. In addition, this course will expose the nurse anesthesia student to the clinical aspects of nurse anesthesia. Students will be paired with a Certified Registered Nurse Anesthetist to provide preoperative, intra-operative and post-operative anesthesia care at a basic level. Student will perform tasks, evaluations, and care for a patient-undergoing anesthesia based on concepts learned in previous and ongoing lectures.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 616 - CHEMISTRY AND PHYSICS OF ANESTHESIA NURSING I

This first basic science in anesthesia course is designed to present a review of inorganic and organic chemistry followed by the principles of biochemistry as it applies to the practice of anesthesia. Students will build on their previous knowledge to develop an understanding of basic chemistry principles that apply to the physiology and pharmacology related to anesthesia.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division

Organizational Syst & Adult Hlth Department

NURS 617 - TECHNOLOGY AND PHYSICS ANESTHESIA NURSING

This course focuses on physics principles required for understanding the mechanisms and actions of anesthetic agents, anesthesia equipment and metabolic theories as they apply to anesthesia practice. Emphasis is placed on the physics of anesthesia including molecular gas laws, density of gases, physics principles as they apply to anesthesia equipment. Students will build on their previous clinical monitoring experiences and expand it to understanding the role of monitoring in vigilance and patient safety during anesthesia. Emphasis is placed on how to check anesthesia equipment to reveal problems before harm comes to the anesthetized patient.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 618 - SPECIAL PROBLEMS IN PRIMARY CARE

Develops special competencies or facilitates in-depth clinical experience in an independent study format. Students who are not specializing in primary care may elect this experience to study selected concepts relating to primary care nursing. Students may register for varying units of credit, ranging from one to three credits per semester, with a maximum of six credits per degree.

1.000 TO 6.000 Credit hours
1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 619 - CLINICAL PRACTICUM IN PRIMARY CARE I

A 225-hour clinical practicum per semester in a variety of community-based clinical settings (including but not limited to); college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, and private practice will stress application of concepts presented in the Diagnosis and Management course. The student will gain increased expertise in communication skills, health assessment skills, interpreting findings, applying epidemiological concepts and developing and implementing plans of care for adults across the lifespan with health maintenance needs, and/or common acute and chronic health problems. The focus of this clinical experience will be on initial workups of new patients, limited short-term relationships with these patients and the evaluation and management of patients with self-limiting acute problems, or stable chronic illnesses as a beginning step in learning diagnosis and management of health problems.

3.000 TO 5.000 Credit hours
1.000 Lecture hours
3.000 TO 4.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 620 - DIAGNOSIS AND MANAGEMENT IN ADULT PRIMARY CARE I

The student will focus on development of critical thinking skills to address health care problems of adults across the lifespan, develop differential problem solving skills and determine appropriate management interventions. The management of common acute and chronic health conditions will include evidence based primary prevention, drug and treatment therapeutics, and referral to other health care providers. Traditional nursing strategies such as education, interpersonal communication, and counseling will continue to be stressed. Case study analyses, group process, lecture and on-line modalities are the principal teaching methodologies used to promote student centered learning.

4.000 Credit hours
4.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 622 - SYSTEMS AND POPULATION IN HEALTH CARE

This core course provides an analysis of critical issues in health care delivery and population health. An overview of the design and structure of the U.S. health care system is presented including the policy, regulatory, financial, technological, and social dynamics impacting health care organizations, health care professionals, and consumers of health care services. Building on knowledge of the health care system, the epidemiological bases for local and national health care trends are examined. Issues of cultural diversity, health disparities, and social justice in health care are analyzed. Strategies to enable advanced practice nurses to influence policy and resources allocation to improve health and reduce health disparities.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 623 - ADVANCED ASSESSMENT OF THE CRITICALLY ILL

This clinical course provides the student an opportunity to develop advanced assessment skills for use with critically ill adults. Students build on previous knowledge and clinical experience to develop advanced skills in comprehensive assessment of the critically ill including invasive monitoring data, appropriate laboratory and diagnostic procedures. Students develop competence in identifying, describing, and analyzing normal and abnormal findings. Clinical experiences in critical care settings provide opportunities for the application of a variety of assessment strategies, and the analysis of a comprehensive database using an organized approach to health assessment at any stage of acute illness. Students without prior Emergency Department or Critical Care experience are required to take N418 CV nursing as Independent study.

NURS 625 - INTRODUCTION TO GERONTOLOGICAL NURSING

This first level course is designed to provide the student with the opportunity to systematically explore concepts relevant to successful aging. Emphasis is placed on normal psychosocial and physical factors rather than the pathological changes associated with aging. Factors that affect the delivery of health services and gerontological nursing care are critically discussed. Aging-related research findings for clinical practice are analyzed. Nursing strategies aimed at health promotion and successful aging are developed.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 626 - PROCESSES OF AGING

This course provides an in-depth analysis of specific concepts related to alterations in the health of the older adult, especially the frail older adult. Emphasis is placed on assessment methodologies and research-based interventions designed to assist the individual to cope with acute and chronic alterations in health. Emphasis is on improving quality of care for the most frail and disabled older adults across the continuum of long-term care.

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 629 - PRIMARY AND SECONDARY PREVENTION OF CANCER

In this introductory course for the oncology advanced practice specialty, the student will examine patient-centered issues important in the development and detection of cancer. The course will begin with an overview of cancer epidemiology with emphasis on familial, racial and national disparities in cancer incidence and mortality. The concepts of primary and secondary prevention, risk factors, relative risk, risk perception, risk calculations and risk reduction (primary prevention) strategies will be explored. Particular cancer screening methods will be examined with respect to their sensitivity, specificity, cost effectiveness, and acceptability to patients. Policy issues regarding availability and utilization of cancer screening and prevention programs will be discussed. Cultural issues with respect to patient education, health practices, access to health care, and attitudes toward illness and cancer will be interwoven into all aspects of the course.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 630 - FPI: HEALTH PROMOTION AND DISEASE PREVENTION

'Health Promotion and Disease Prevention' focuses on health promotion and disease prevention strategies for patients across the life span. Addresses the health promotion role of the family nurse practitioner in primary care. Emphasizes the multidimensionality of health promotion and disease prevention within emergent family systems. Synthesizes data to formulate a comprehensive management plan for patients across the life span.

2.000 Credit hours

2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 631 - FPI: HEALTH PROMOTION AND DISEASE PREVENTION PRACTICUM

Emphasizes the clinical implementation of health promotion and disease intervention strategies for patients across the life span. Concentrates on the health promotion role of the family nurse practitioner in primary care settings. Includes the synthesis of data and the formulation of comprehensive management plans for patients and families.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 632 - CLINICAL MANAGEMENT OF COMMON HEALTH CARE PROBLEMS

Focuses on developing a knowledge base for effective diagnosis and management of selected acute, commonly occurring health care problems throughout the life span. Integrates pathophysiology, psychopathology and pharmacotherapeutics, with growth and developmental concepts within the context of family theory.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 633 - CLINICAL MANAGEMENT OF COMMON HEALTH CARE PROBLEMS PRACTICUM

Focuses on the clinical application of critical diagnostic reasoning skills in the case management of acute commonly occurring health care problems encountered across the lifespan. Emphasizes clinical integration of pathophysiology, psychopathology, pharmacotherapeutics, family theory, health promotion, growth and developmental processes within family practice settings. Stresses the diagnostic and therapeutic role of the family nurse practitioner in primary care.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 634 - ADVANCED HEALTH ASSESSMENT OF THE OLDER ADULTS

In this clinical course taken concurrently with Health Assessment, the student develops the knowledge and skills necessary for the beginning level of the gerontological nurse in advanced practice roles. The focus is on the assessment of all aspects of the older adult's health status, including health promotion, health protection, and disease prevention. Clinical reasoning skills to differentiate normal changes associated with aging from abnormal findings associated with disease processes are also emphasized. Exploration of the advanced practice nursing role in clinical, geriatric health care settings facilitates the student's role transition and realistic understanding of the advanced practice role.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 635 - PRAC PERINATAL NEONATAL CLIN

4.000 Credit hours

4.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 636 - CLINICAL DIAGNOSIS AND MANAGEMENT OF THE OLDER ADULT

Prepares the student to function as a gerontological nurse practitioner (GNP) in an ambulatory or long-term setting with older adults who present with common acute and chronic health problems. The student applies assessment skills, laboratory/diagnostic methods and clinical diagnostic reasoning skills in caring for older adults. Treatment strategies that include selection of pharmacotherapeutic agents emphasize the total wellbeing of the older adult (physical, psychosocial, cognitive and environmental components).

6.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 637 - ANESTHESIA NURSING PRACTICUM I

This course will build on the previous clinical experiences and lectures to allow the student nurse anesthetist to provide comprehensive anesthesia care through the whole spectrum of the anesthesia process. Students will continue to provide pre-anesthetic assessments, develop anesthesia care plans, provide safe and effective anesthesia pre-operatively, intra-operatively and post-operatively. Students will perform at a basic level under the supervision of a Certified Registered Nurse Anesthetist or anesthesiologist. Student will present and discuss cases, clinical difficulties and solutions with peers and faculty in weekly clinical conference.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 638 - SPECIAL PROBLEMS IN PERINATAL/NEONATAL NURSING

Provides for alternative learning experiences: independent study, development of specific clinical competencies, classes focusing on a variety of special interest topics or topics of an interdepartmental nature within the broad category of maternity nursing. Students may register for varying amounts of credit, ranging from one to three credits per semester, with a maximum of six credits per degree.

1.000 TO 6.000 Credit hours

1.000 TO 6.000 Lecture hours

NURS 640 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS

Focuses on the disease management of complex chronic health care problems in patients across the life span. Integrates pathophysiology, pharmacotherapeutics, growth and development and health promotion into the context of family practice settings. Emphasizes the ongoing development of critical thinking skills for comprehensive assessment, diagnosis and therapeutic interventions for chronic health care problems in children and adults.

2.000 Credit hours

2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 641 - CANCER MANAGEMENT

This is the last of three didactic courses required for completion of the master's specialty track for advanced practice in

oncology nursing. Strategies for cure of cancer, treatment of non-curable cancer, and management of commonly encountered symptoms and side effects due to the cancer itself or to the treatment are discussed using relevant clinical research.
3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 642 - PROFESSIONAL ASPECTS OF ANESTHESIA NURSING

This course is designed to explore various professional issues and national health policy that affects nurse anesthesia practice and the nurse anesthesia profession. Students will review the history and organization of the American Association of Nurse Anesthetists and the responsibilities of the nurse anesthesia councils. Emphasis will be placed on the ethics of nurse anesthesia and the legal challenges and responsibilities of a certified registered nurse anesthetist.
1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 643 - ADVANCED NURSING OF CHILD DIAGNOSTIC REASONING

This clinical course emphasizes the role of the advanced practice nurse in the management of acutely ill infants, children, and adolescents. Clinical experiences are in hospitals, emergency settings, and trauma/emergent care facilities. The focus of this course is implementation of the nursing process, advanced psycho-physiological assessment skills, diagnostic skills, and pharmacological management and treatment plans for children with acute health needs. A strong emphasis will be placed on the needs of families when children suffer acute illness/trauma and community resources that can assist them. An additional focus of the course is the blending of the clinical specialist roles with practitioner skills. Critical or clinical pathways will provide the foundation for exploring the needs of children and families. This course is taught during the eight-week summer session.
2.000 Credit hours
2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 644 - CLINICAL MANAGEMENT OF COMPLEX HEALTH PROBLEMS

Focuses on the management of complex chronic health care problems in patients across the life span. Emphasizes effective implementation of critical thinking skills for age-appropriate assessment, diagnosis, and treatment of chronic health care problems encountered with patients in a variety of family practice settings.
3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 645 - ADVANCED NURSING OF CHILDREN II

Focuses on the emerging role of the advanced practice pediatric nurse and the delivery of primary care within the reconceptualization of the health care system. Involves the synthesis of all prior coursework, application of critical thinking to the clinical arena, implementation of the nursing process, and advanced physical assessment skills. Emphasizes tertiary care-based services.
5.000 Credit hours
5.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 646 - ADVANCED PRACTICE ROLE

This seminar course is the final synthesis course in the advanced practice acute care/tertiary advanced practice pediatric nurse practitioner program. This course will focus on the emerging role of the advanced practice nurse in the acute care or tertiary setting. Areas of emphasis are role realignment, organizational theory, legal and ethical decision-making, collaborative relationships and managed care issues in the health care system.
2.000 Credit hours
2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 647 - DIAGNOSIS AND MANAGEMENT OF COMMON ACUTE CARE PROBLEMS

Provides the basic knowledge and skills necessary to practice at the beginning level as an advanced practice nurse with adult populations in acute care settings. Emphasizes the development of a conceptualization of the role of advanced practice nurses, skills in diagnostic reasoning and clinical decision-making, and the examination of theoretical and empirical bases for advanced nursing practice. Direct practice content focuses on health problems commonly encountered in acutely ill and injured individuals. Indirect practice content focuses on the critical analysis of medical and nursing interventions commonly used with acutely ill adults. Clinical experiences in acute care settings provide opportunities for the development of diagnostic reasoning and beginning management of common acute care problems.

5.000 Credit hours
2.000 Lecture hours
3.000 Other hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 648 - SPECIAL PROBLEMS IN NURSING OF CHILDREN

Provides alternative learning experiences: independent study, development of specific clinical competencies, classes focusing on a variety of special interest topics or topics of an interdepartmental nature within the broad category of nursing of children.

1.000 TO 6.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 649 - ADV NURS HIGH-RISK NEONATE I

1.000 TO 6.000 Credit hours
1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 654 - PRINCIPLES OF ANESTHESIA NURSING III

The course will build on the information presented in previous courses to familiarize the nurse anesthetist student with anesthetic drugs, techniques, and surgical issues unique to the cardiothoracic patient and the surgical patient with cardiac disease.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 655 - CONCEPTUAL FOUNDATIONS OF FAMILY THERAPY

This course offers the student an orientation to family theory and various methods and techniques of family therapy directed toward the delineations of family systems and the identification of possible directions and methods of affecting changes in such systems. The course includes a seminar in family concepts related to different family therapy theorists and provides an opportunity for the student to begin to identify a personal operating position on family theory and therapy.

2.000 Credit hours
2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 656 - CONCEPTUAL FOUNDATIONS OF FAMILY THERAPY: PRACTICUM

This course provides an opportunity for students to apply concepts of family therapy in a clinical setting. Assessment of multiple families will be undertaken. Theoretically grounded techniques will be utilized and evaluated. Students will be expected to critically analyze strengths and barriers to the therapeutic use of self in clinical settings. This course offers a student the opportunity to integrate family therapy theory with practice applications and provides an opportunity for students to begin to identify a personal operating position on family theory and therapy.

3.000 Credit hours
3.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 657 - ANESTHESIA NURSING PRACTICUM II

This clinical course provides opportunity for the student anesthetist to continue to develop judgment, insight, and knowledge of clinical practice. Students will provide a pre-operative assessment and develop anesthesia care plans for more complex patients under the direct supervision of a certified registered nurse anesthetist or an anesthesiologist instructor. Students will operate at a more advanced level, begin to develop more complex anesthesia care plans, and administer anesthesia care more independently. Student nurse anesthetists will attend a weekly clinical conference to present cases to their peers and faculty. Students will discuss case problems and achievements and discuss solutions based on discussion with other students and faculty.

1.000 OR 5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 658 - SPECIAL PROBLEMS IN ADULT PSYCHIATRIC NURSING

This course provides alternative learning experiences: independent study, development of specific clinical competencies, classes focusing on a variety of special interest topics or topics of an interdepartmental nature within the area of adult psychiatric nursing. Students may register for varying amounts of credit, ranging from 1 to 3 credits per semester, with a maximum of 6 credits per degree.

1.000 TO 6.000 Credit hours

1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 659 - ORGANIZATIONAL AND PROFESSIONAL DIMENSIONS OF ADVANCED NURSING PRACTICE

This core course provides content related to organizational and professional challenges experienced by nurses in advanced practice whether in clinical care, education, management, or research. The course examines professional, social and organizational factors that influence work of advanced practice nurses. Roles that advanced practice nurses assume are examined with a particular emphasis on leadership development. Leadership strategies address fiscal management; interdisciplinary, inter-and-intraorganizational collaboration; professional and business ethics; and quality improvement. The course encompasses advocacy for the profession and for clients, management of innovation and change, as well as the strategies and skills needed for working in groups. The course is intended to be taken concurrently with clinical courses.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Graduate School Department

NURS 660 - ADVANCED HEALTH ASSESSMENT LIFESPAN

This course focuses on assessment and clinical decision-making in advanced nursing practice within a family context. Students develop and strengthen skills related to health assessment including physical, psychosocial, cultural, and family dimensions of assessment. Clinical decision-making skill development focuses on appropriate interpretation of multidimensional assessment data and individualization of assessment approaches based on client situation. Emphasis will be placed on proper examination and written documentation techniques.

4.000 Credit hours

4.000 Lecture hours

Schedule Types: Clinical

School of Nursing Division
Nursing Department

NURS 664 - THERAPEUTIC INTERVENTIONS ACROSS THE LIFESPAN IN MENTAL HEALTH NURSING

This graduate seminar course introduces students to selected theoretical constructs and therapy processes related to various models of individual therapy and group therapy practice. Students will have the opportunity to analyze and critique relevant research, selected clinical applications to special populations across the lifespan, and identify outcomes associated with use of different frameworks. Legal, cultural, and ethical implications of individual and group therapy will be discussed.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 665 - THERAPEUTIC INTERVENTIONS ACROSS THE LIFESPAN IN MENTAL HEALTH NURSING PRACTICUM

This practicum course provides an opportunity for students to apply concepts of brief individual and group psychotherapy across the life span. Theoretically grounded brief individual and group therapy strategies form the basis of assessment, intervention, and evaluation of treatment outcomes. Students have the opportunity to collaboratively develop therapeutic contracts and work with clients in individual and group therapies (eight hours fieldwork per week plus clinical supervision). Clinical supervision will provide students with the opportunity to critique treatment outcomes and therapeutic use of self in brief individual and group psychotherapy.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 666 - BIOFEEDBACK

This course will be an entry-level, experiential course in biofeedback, self-regulatory training, and stress management. The course covers the content areas of the Biofeedback Certification Institute of America biofeedback certification exam. These include basic applied psychophysiology and self-regulation, psychophysiological assessment, biofeedback instrumentation, biofeedback training for various conditions, and issues of professional practice. Students will engage in a wide range of learning activities including lectures, discussions, experiential biofeedback, and relaxation training. Students will ultimately be capable of designing brief biofeedback training protocols for patients with selected disorders.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 667 - DIFFERENTIAL DIAGNOSIS OF MENTAL DISORDERS ACROSS THE LIFESPAN

This core specialty course provides the student with the knowledge and skill to perform advanced clinical assessment of mental disorders using the Diagnostic and Statistical Manual of Mental Disorders. The course emphasizes a multidimensional approach to assessment that integrates behavioral and social data into a comprehensive clinical evaluation of behavioral dysfunction and mental disorders, with appropriate recommendations for treatment of individuals across the life span. The course incorporates the use and interpretation of psychological behavioral scales, laboratory tests, observational and interview data integrated with the latest scientific knowledge about the biopsychological and socio-cultural dimensions of mental disorders. Clinical applications, appropriate to the student's population focus of study (adult, geriatric, child, and adolescent), allow students to complete comprehensive clinical assessments related to the diagnosis and treatment of major mental disorders. Students are encouraged to select patients for clinical assessments from medically underserved and vulnerable populations.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Behavioral & Community Health Department

NURS 668 - SPECIAL PROBLEMS IN CHILD PSYCHOLOGY

This course provides alternative learning experiences: independent study, development of specific competencies, classes focusing on a variety of special interest topics or topics of an interdepartmental nature within the area of child psychiatric nursing. Students may register for varying amounts of credit, ranging from 1 to 3 credits per semester, with a maximum of 6 credits per degree.

1.000 TO 6.000 Credit hours

1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 669 - PRIMARY CARE OF WOMEN

Provides the theoretical and clinical foundation for a nurse practitioner to manage health maintenance and nonlife-threatening disruptions specific to women throughout their life span. Collaboration with other health care providers is emphasized. Content includes normal antepartum and postpartum care, contraception, menopause and common gynecological disruptions, including the prevention and treatment of sexually transmitted diseases.

4.000 TO 6.000 Credit hours

4.000 TO 6.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 670 - ISSUES IN SCHOOL HEALTH

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 671 - EPIDEMIOLOGICAL ASSESSMENT STRATEGIES

This course focuses on assessment of physical and social indicators of public health. Epidemiologic methodologies will be stressed, with application to public health problems of the student's choice. Assessment strategies and applications will continue the aggregate focus introduced in the core. The course will build on the public health principles and practices introduced in the community/public health nursing specialty curriculum. Students will be ready to design programs and address needs identified from an empirically based assessment process.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Behavioral & Community Health Department

NURS 672 - PRINCIPLES OF ANESTHESIA NURSING IV

The course is designed to build on the information and techniques presented in Principles of Anesthesia I, II, and III with an emphasis on the anesthetic management of the trauma patient including orthopedic, neurosurgical, thermal injury, and emergency patients. The student will review the specific anesthetic need of the surgical trauma patient and the emergency surgical patient. Relevant pathophysiology, assessment process, clinical management and safety issues will be emphasized.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 673 - ANESTHESIA NURSING PRACTICUM III

This clinical course provides opportunity for the student anesthetist to continue to develop judgment, insight and knowledge of clinical practice. Students will provide a pre-operative assessment and develop anesthesia care plans for more complex patients under the direct supervision of a certified registered nurse anesthetist or an anesthesiologist preceptor. Students will operate at a more advanced level, begin to develop more complex anesthesia care plans and administer anesthesia care more independently. Student nurse anesthetists will attend a weekly clinical conference to present cases to their peers and faculty. Students will discuss case problems and achievements and discuss solutions based on discussion with other students and faculty.

5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 674 - ANESTHESIA NURSING PRACTICUM IV

This course is designed to allow the student registered nurse anesthetist to further incorporate previous lectures and clinical experience to provide anesthesia to the entire spectrum of patients at an independent level. Students will provide anesthesia under the supervision of a certified registered nurse anesthetist or anesthesiologist. Students will provide a pre-operative assessment, develop an appropriate anesthesia care plan, and provide a safe anesthetic with minimal input from their supervising anesthesia provider.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 675 - ADVANCED ANESTHESIA NURSING SEMINAR II

This anesthesia course is the second of two designed to integrate the didactic curriculum with several semesters of clinical anesthesia practice. Student Registered Nurse Anesthetists (SRNAs) will review the practice of nurse anesthesia using current information and resources reflecting the standards of practice in the field of nurse anesthesia. Utilizing lecture and discussion students will synthesize and analyze complex didactic and advanced clinical knowledge in a case based approach.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 676 - ANESTHESIA NURSING PRACTICUM V

This course is the final clinical practicum of the program. It is designed to provide the student anesthetist a final opportunity to strengthen clinical skills and incorporate current anesthesia practices into their practice. Students will practice under the direct supervision of a certified registered nurse anesthetist or anesthesiologist at an independent level. Students will assess patients, develop care plans, and provide anesthesia for all types of cases with minimal input from the supervising anesthesia provider. The clinical conference is designed to allow the student registered nurse anesthetist to meet with their peers and faculty to discuss recent cases, problems, and solutions. Students in their final practicum are expected to assist lower level students to find solutions to their clinical problems.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 677 - ELEMENTS OF CLINICAL RESEARCH DESIGN AND ORGANIZATION

Introduces students to the field of clinical research. Types and phases of clinical research, consideration of sampling, study goals including primary and secondary endpoints, protocols, design elements, ethical principles, consideration of alternative therapies, biotechnology, social science interventions, and regulatory requirements. Students will participate in evaluating study design criteria and critically assessing implications for clinical trial organization, legal and regulatory compliance, and establishment of responsibilities and a collaborative environment for clinical research study personnel.

3.000 Credit hours

Family and Community Health Department

NURS 679 - ADVANCED PRACTICE ROLES AND HEALTH CARE DELIVERY SYSTEMS

Supports, expands, and applies trauma, emergency department, acute and critical care expertise to clinical nurse specialist/advanced practice nurse role functioning. In this course students analyze the role and influence of the advanced practice nurse/clinical nurse specialist on the health care environment and on the delivery of care. Clinical experiences and seminars focus on the developing diverse leadership roles of the advanced practice nurse/clinical nurse specialist and related skills including: facilitating education/learning, advocacy/moral agency, implementing evidence-based practice, management, consultation/collaboration, facilitating clinical inquiry and research.

NURS 684 - CLINICAL RESEARCH IMPLEMENTATION

Standards for the conduct, performance, monitoring, auditing, recording, data collection, and analyses and reporting of clinical research that provide the basis for establishing good clinical practice will be examined. This includes the management of culturally diverse clinical trials that may involve *intranational* as well as international studies. Issues involved in informed consent, records maintenance and storage, management of drugs and devices, and required investigator file contents provide a focus for study planning and operational procedures. Patient recruitment and retention methodologies will be detailed. Students will gain experience in completing required Case Report Forms, managing data meeting HIPAA requirements and developing a recruitment campaign.

NURS 689 - SPECIAL PROBLEMS IN CLINICAL SPECIALIZATION

Independent study in any area of clinical specialization. Students may register for varying amounts of credit ranging from 1 to 3 credits per semester with a maximum of 6 credits per degree.

1.000 TO 6.000 Credit hours
1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 690 - MANAGERIAL HEALTH FINANCE

The course emphasizes conceptual and practical issues related to health care economics, financial management, and budget preparation. Using the business model as a frame of reference, students are exposed to topics such as cost and cost behavior, operating and capital budgeting, forecasting, and strategic planning, as well as the roles and responsibilities of the nurse leader in fiscal management of health care resources.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 691 - ORGANIZATION THEORIES: APPLICATION TO HEALTH SERVICE MANAGEMENT

Serves as a foundation for other curriculum offerings in the Health Services Leadership & Management program with a focus on social science theories and administrative elements of planning, organizing, leading, and evaluating. The course covers management principles and issues related to organizational behavior in the health care industry. Teaching/learning strategies include simulation, small group exercises, self-assessment instruments, and audiovisual aids.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 692 - NURSING AND HEALTH SERVICES ADMINISTRATION

Focuses on professional and organizational dynamics of health systems management. Professional dynamics include an exploration of practice issues, ethics, negotiation and labor relations. Organizational dynamics include prototypic technology, quality improvement systems, strategic planning and resource analysis. Students construct and analyze a case scenario using an operational process improvement method; and, develop a business plan using planning and financial analysis.

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 693 - CLINICAL RESEARCH PRACTICUM

This capstone course prepares students for clinical research management (CRM) positions. The course exposes the student to clinical research management in a live research environment. Students work with a preceptor a minimum of 135 hours during the semester and attend a two-hour weekly seminar to integrate theory into practice.

5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 695 - PRACTICUM IN HEALTH SERVICES LEADERSHIP AND MANAGEMENT

This is the capstone course of the Health Services Leadership & Management program preparing students for advanced or executive leadership/management responsibilities in selected healthcare organizations. Course content builds upon and integrates theoretical knowledge and skills acquired in pre-requisite curriculum offerings. The essence of this course is based upon a comprehensive field experience (practicum) with an underlying focus on leadership principles and practices. Field experience sites are arranged between faculty and student(s) and are related to the latter's current work setting and/or future career goals.

NURS 697 - POLICY, POLITICS AND ADVOCACY: MAKING YOUR VOICE HEARD

This course provides an overview of how health professionals can influence health policy and the competencies needed to be effective. A seminar format allows students to test their own views about current policy issues. Guest speakers from public and private sector agencies in which nurses are engaged in various types of policy roles provide a springboard for students to envision how they might integrate policy into their own careers. Extensive feedback is provided on policy-writing skills and ability to function effectively in a policy role. Class sessions with nurses and others in key policy roles allow students to identify and evaluate a variety of policy leadership styles and strategies for success in the public policy arena. Additionally, students are introduced to health services research and are encouraged to use current research to address perplexing policy problems and develop solutions with sound rationales.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Educ Admin Hlth Pol & Informat Department

NURS 701 - SCIENCE AND RESEARCH FOR ADVANCED NURSING PRACTICE

Key role expectations for advanced nursing practice across a variety of practice settings include incorporating findings from the research literature and research-related resources into clinical practice, participating as research team members, and developing and implementing small-scale studies in health-related research. This course provides students with essential knowledge and preliminary skills to meet these role expectations, and to position them for subsequent doctoral level education. A dual emphasis upon the research process and research utilization is maintained, building on the student's knowledge of research methods and statistics from undergraduate research courses including univariate and bivariate descriptive and inferential statistics such as Descriptive Statistics, Pearson r, Chi-square, and T-test. Course content and learning strategies address (a) the role of conceptualization and nursing theoretical perspectives in the research process, (b) the interaction of theory, research, and practice in the development of clinical outcomes, (c) research design, sampling, measurement, data collection, and statistics and (d) research integrity.

4.000 Credit hours

4.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 702 - WRITING FOR PUBLICATION

This course is designed to teach master's and doctoral students the steps for successful publication in professional journals. Topics covered include: an overview of the publishing process, developing an idea for publication, selecting an appropriate journal, determining authorship, writing a query letter, developing the first draft, and writing the final draft. Elements of a manuscript review for a journal editor also will be addressed.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 703 - FAMILY PRACTICE SPECIALIST ROTATION

This is the third sequential clinical course in the Family Nurse Practitioner (FNP) Specialty. This course provides the students with clinical application and knowledge of selected specialty topics commonly encountered in family practice. Concepts of health promotion, maintenance and restoration will be explored. The course integrates pathophysiology, psychopathology, pharmacotherapeutics, growth and development, and health promotion within the context of culturally diverse family practice settings and outpatient specialty services. This course emphasizes the ongoing development of advanced critical thinking skills for comprehensive assessment, diagnosis and management, including skills for therapeutic interventions for health care problems across the lifespan. This course will provide students with the opportunity to refine clinical diagnostic and reasoning skills, to select appropriate referrals and to participate in interdisciplinary collaboration with other health care providers. Family adaptation to health/illness changes and coping strategies will also be addressed.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 704 - PROGRAM EVALUATION IN NURSING

This course introduces various models and approaches available for the evaluation of nursing programs in both educational and service settings. It focuses on the components of various models, their relative strengths and weaknesses, and their utility for the evaluation of nursing programs. Opportunities to assess program evaluation efforts in nursing are also provided.

Prerequisite: Permission of instructor.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 705 - CONCEPTS AND METHODS FOR THE MEASUREMENT OF CLINICAL AND ADMINISTRATIVE OUTCOMES

This course examines concepts and methods required to measure clinical and administrative outcomes, with a focus on developing competencies in outcome measurement for advanced practice nurses. Emphasis is on identifying significant issues in care delivery, selecting appropriate outcomes of safe, timely, effective, efficient, equitable, and patient-centered care. Students will use a quality improvement framework to evaluate a practice change in a selected clinical setting through a 45-hour practicum. The evaluation will include selecting a clinical and cost outcome, conducting an analysis to measure the success of the change, and the evaluation with recommendations. Common approaches to patient, population and system outcome measurement will be explored.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 706 - INTRO TO NURSE MIDWIFERY

Provides theoretical and practical preparation to provide women with safe and effective nurse-midwifery care for common health problems. Applies the nurse-midwifery management process and model, which incorporates current theories, evidence-based research and clinical experiences relevant to nurse-midwifery, to the provision of primary care to women. Focuses on advanced health assessment techniques used by nurse-midwives in the management of common health problems and the role of the nurse-midwife as a provider of primary health care.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 707 - EVIDENCE BASED PRACTICE IN MENTAL HEALTH

This course introduces students to the unique challenges of maintaining an evidence-based nursing practice in mental health

nursing. It provides the student with advanced concepts and skills for developing and maintaining self-directed lifelong learning habits so that current knowledge in the discipline is maintained. During six two-hour sessions and one three-hour session, students will use independent and collaborative learning techniques to develop these skills.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 708 - SPECIAL PROBLEMS IN NURSING RESEARCH

This course develops further research competencies through independent study. Registration upon permission of instructor. Variable amounts of credit, ranging from 1 to 3 per semester may be taken, with a maximum of 6 credits per degree.

1.000 TO 6.000 Credit hours

1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 709 - MANAGED CARE SERVICES

Health care is being restructured as an integrated system with a focus on the management of clients across a continuum of care. Increasingly, there is emphasis on preventive health care, quality, and access while decreasing costs. This course provides an analysis of the health care environment relative to managed care; evaluation of patient service models; techniques for resource identification and acquisition; and methods to standardize and evaluate care. It gives a frame of reference that is foundational to understanding care management from an organizational and administrative process perspective.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 710 - HEALTH SUPERVISION OF THE WELL CHILD I

Provides the beginning preparation to assume the role of primary care provider for children 0-10 years of age. Provides an in-depth analysis of theories and behaviors relevant to health promotion and the advanced practice role. Normal growth and development is emphasized. The role of the advanced practice nurse as an educator is highlighted.

3.000 Credit hours

2.000 Lecture hours

1.000 Other hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 711 - HEALTH SUPERVISION OF THE WELL CHILD II

Provides the beginning preparation to assume the role of a primary care provider for adolescents. Normal growth and development are emphasized. The role of the advanced practice nurse as a collaborator and researcher is highlighted.

3.000 Credit hours

2.000 Lecture hours

1.000 Other hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 713 - COMMON HEALTH PROBLEMS OF CHILDREN I

Focuses on selected health problems of children frequently encountered in ambulatory settings and the underlying alterations in health equilibrium. Emphasis is placed on problem identification, application of appropriate regulatory processes and evaluation of the effectiveness of intervention.

3.000 Credit hours

2.000 Lecture hours

1.000 Other hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 714 - COMMON HEALTH PROBLEMS OF CHILDREN II

Focuses on selected health care problems of children and the underlying alterations in health equilibrium. The problems considered are of a more complex nature than those studied in NURS 713 and more prevalent in older children and adolescents. Problem identification, application of appropriate regulatory processes and evaluation of the effectiveness of intervention are emphasized.

2.000 Credit hours
2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 715 - ADVANCED PRIMARY CARE OF CHILDREN

This course is designed to integrate and synthesize the material from all previous coursework and new concepts relevant to the pediatric nurse practitioner in primary care. Clinical experiences require the assumption of a more independent role in assessing and managing the health care of children from birth to adolescence as part of a multidisciplinary health care team.

5.000 Credit hours
2.000 Lecture hours
3.000 Other hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 716 - DIAGNOSIS AND MANAGEMENT IN ADULT PRIMARY CARE II

This course prepares the student to diagnose and manage complex, multiple, and chronic health needs of adults across the life span in primary care settings. Diagnostic reasoning skills and advanced decision-making are refined. Specific attention is paid to role, legal, policy, and health care finance issues relative to primary care nurse practitioners. The student will focus on the progression of the patient problem, refine differential problem-solving skills, and determine appropriate management interventions. The student is expected to synthesize previously learned concepts in primary care nursing.

4.000 Credit hours
4.000 Lecture hours
4.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 717 - CLINICAL PRACTICUM IN PRIMARY CARE II

In this clinical course taken concurrently with Advanced Diagnosis and Management of Adults Across the Lifespan, the student functions as an adult nurse practitioner in primary care settings (including but not limited to: college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, and private practice) with adults who have complex and multiple health problems. The student will synthesize and integrate previously learned concepts to promote the health of adults and develop more independent diagnosis and management of patients with multi-system problems. Using a problem-solving approach and evidence-based practice guidelines, the student will determine an optimal plan in relation to both short- and long-term health-related goals for clients they see on an ongoing basis. Emphasis is on increased independence and decision-making in a multidisciplinary environment. The student is expected to assume an increased responsibility for the quality of health care rendered and to participate in evaluative activities.

3.000 OR 5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 718 - ADVANCED PRIMARY CARE OF WOMEN PRACTICUM

Provides the opportunity to provide care to women with complex health problems across the life span. Focuses on implementing advanced practice concepts for nursing care, theoretical models and nursing role for the advanced practice women's health nurse practitioner in a variety of settings, including high-risk perinatal centers, ambulatory women's health centers, home care settings or school-based centers.

2.000 TO 6.000 Credit hours
2.000 TO 6.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 719 - CLINICAL ASPECTS OF DRUG ABUSE

This course emphasizes information on commonly misused and abused psychoactive drugs, the genesis of addiction, the clinical expression of addiction, and the use of various types of intervention, therapies, and supports. A one credit clinical practicum is designed to enhance the care of patients who misuse or are addicted to alcohol, tobacco, and other drugs.

3.000 Credit hours
2.000 Lecture hours
1.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 721 - CELL BIOLOGY TUTORIAL I

This is a Web-based tutorial for doctoral or master's nursing students who want to expand their knowledge of cell structure and function in the human body. Each week, students will formulate and discuss answers to questions on specific topics posed by the instructors concerning the assigned reading.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 722 - CELL BIOLOGY TUTORIAL II

This is the second phase of a Web-based tutorial for doctoral or master's nursing students who want to expand their knowledge of cell structure and function in the human body. Each week, students will formulate and discuss answers to questions on specific topics posed by the instructors concerning the assigned reading.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 723 - CLINICAL PHARMACOLOGY AND THERAPEUTICS ACROSS THE LIFESPAN

This course provides advanced knowledge of commonly prescribed pharmacologic agents. Rationales for the use of pharmacologic agents in the treatment of selected health problems are presented. Clinical considerations for drug selection and initiation, maintenance and discontinuation of drug treatment are examined. Legal requirements and implications for pharmacotherapy are reviewed.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 724 - SPECIAL PROBLEMS

Provides the opportunity to study a topic of interest within nursing and includes classes on a variety of special interest topics of an interdepartmental nature.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Behavioral & Community Health Department

NURS 726 - DIAGNOSIS AND MANAGEMENT OF COMPLEX ACUTE CARE PROBLEMS

Provides the advanced knowledge and skills necessary to function as an acute care practitioner. Promotes refinement of skills in assessment, diagnostic reasoning, and clinical decision-making, development of, as well as implementation of nursing interventions for critically ill patients. Analyzes the emerging role of the acute care nurse practitioner within the legal constraints of the health care delivery system. Examines the theoretical and empirical basis for diagnosing and managing adult patients with complex acute care problems. Clinical experiences focus on collaborative care of adult patients with complex health problems.

4.000 Credit hours
2.000 Lecture hours
2.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 727 - ADVANCED ACUTE CARE MANAGEMENT

Emphasizes increased independence in the assessment, diagnosis, and management of acutely ill adults with multisystem problems. Clinical experiences and seminar sessions are designed to assist in the integration and synthesis of previously learned concepts in managing acutely ill adults across the continuum of acute care. Emphasis is on increased independence and decision-making in an inter-professional environment. Clinical and professional practice issues are explored.

4.000 Credit hours

3.000 Lecture hours

1.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 728 - LEGAL AND REGULATORY ISSUES IN NURSING

This presents an overview of the legislative, regulatory, and judicial systems of national and state governments as sources of health care law. Selected court decisions that include nursing malpractice, patients' rights, informed consent, termination of treatment, and assisted suicide are discussed. Class time will be allocated to research laws affecting health care providers in the Annotated Code of Maryland and the Code of Maryland Regulations. Students meet with representatives of the Maryland General Assembly and attend a legislative hearing.

2.000 TO 3.000 Credit hours

2.000 TO 3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 729 - ESSENTIALS OF MANAGED CARE

This course provides an overview of concepts and principles fundamental to understanding a system dominated by managed care. The health care environment, pertinent organizational structures, financing arrangements, disease management strategies, and accreditation mechanisms are examined. It emphasizes nursing implications, public policy reform initiatives, and ethical dilemmas.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 730 - ENVIRONMENTAL HEALTH I

Provides an overview of environmental areas for study, emerging environmental issues, major health hazards, and identification of responsibilities for advanced practice nurses and other health professionals. Reviews the history of environmental health legislation and regulatory agencies. Uses a framework for analyzing major environmental health issues to explore how the environment can influence health. Recognition of the need for interdisciplinary teamwork in assessment, diagnosis, and community-wide or population-based health promotion/disease prevention interventions is highlighted.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Behavioral & Community Health Department

NURS 731 - INTEGRATIVE MANAGEMENT OF PRIMARY HEALTH CARE PROBLEMS

Emphasizes the multi-faceted implications of the role of the advanced practice nurse. Provides the forum for addressing role issues encountered in primary care settings, comparing clinical experiences, implementing marketing strategies and clarifying professional licensure/certification/practice requirements. Integrates the management of acute and chronic health care problems.

2.000 Credit hours

2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 732 - PROGRAM PLANNING AND EVALUATION IN COMMUNITY/PUBLIC HEALTH

This course focuses on the systematic inquiry of the foundations of advanced community/public health program planning and evaluation. Emphasis is on the assessment, planning, and evaluation of population/community-focused health promotion/disease prevention programs and projects.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 733 - LEADERSHIP IN COMMUNITY/PUBLIC HEALTH NURSING

Focuses on integration and application of principles of leadership, management, program planning, implementation and evaluation in population-based efforts to provide affordable quality care. Special emphasis is placed on the practical skills needed for the community/public health nurse to succeed as a leader and manager in the current domestic and international health care environment.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 734 - ADVANCED DIAGNOSIS AND MANAGEMENT OF THE OLDER ADULT

In this clinical course, the student functions as a gerontology nurse practitioner in healthcare settings with older adults who have multiple health problems and complex clinical syndromes. The student will be able to synthesize and integrate previously learned concepts to further refine the advanced application of assessment, differential diagnoses skills, and increasingly independent development of appropriate therapeutic interventions for the older adult who presents with complex clinical syndromes in a variety of settings.

7.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Adult Health Nursing Department

NURS 735 - APPLIED TOXICOLOGY

This course surveys the principles of toxicology that pertain to human health and the environment. It includes the historical background of toxicology; principles of absorption, distribution, metabolism, and elimination; effects of toxic agents, food additives, and pollutants with effects on general and susceptible populations; comparative effects on other animal populations; risk communication and the integration of these principles into public health practice. It provides knowledge and working insight into toxic environmental hazards that can affect the diverse human populations that are served by community health nurses and other public health professionals. It uses an interdisciplinary approach to meet course objectives.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 736 - TECHNICAL SOLUTIONS KNOWLEDGE GENERATION IN HEALTH CARE

This introductory course in nursing informatics is designed to foster the attainment of the knowledge, skills, and abilities essential for beginning a successful career as a nursing administrator, educator, or expert clinician in an information technology enabled health care environment. The organizing framework develops themes of social context, technology, information, nursing, and health care. Emphasis is given to the nursing application of information technology. Components of computer technology are identified and defined, and their functions analyzed. Clinical, administrative, and educational computer applications are analyzed. Resources that can assist the nurse and health care professional learn more about.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 737 - NURSING INFORMATICS CONCEPTS AND PRACTICE IN SYSTEMS ADOPTION

This second level nursing informatics course is designed to further develop the skills of information technology applications introduced in NURS 736 and to emphasize the principles and practices of nursing and health care informatics. The organizing framework introduced in NURS 736 is continued, with themes of social context, technology, information, and nursing and health care. Functions of the informatics nurse specialist, including system selection, implementation, research, and evaluation, are explored in depth. Organizational theories are considered in relation to information system planning, implementation, and evaluation. In addition, the analysis of health care data and its language, the management of ongoing information systems for health care, and the use of technology standards in system development are examined. The impact of information systems on health care provider roles and on emerging information technology roles is also analyzed. Learning activities include development of an information system selection document for an appropriate information system to meet identified health care needs; planning the implementation of an information system; and identifying the impact of selected trends on the design of health care information systems. Critical thinking and analytic skills will be applied to discussions and assignments (e.g.,

investigation of informatics research literature).

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Educ Admin Hlth Pol & Informat Department

NURS 738 - PRACTICUM IN NURSING INFORMATICS

Practical experience in selected agencies/businesses with preceptors reinforces and enhances the skills needed by informatics nurse specialists' to analyze, select, develop, implement, and evaluate information systems that impact nursing and health care. Experiences also allow students to analyze the information technology roles of their preceptors. Experience in project management, consultation, user interface, systems design, evaluation of system and role effectiveness, and application of research skills are emphasized. During the practicum, students will work with informaticians who are functioning in the field of nursing/health informatics. Students will be assigned to health care agencies, health care information technology businesses, or health care consulting firms for the practicum. An average of eight hours a week (96 hours total) is spent at the field agency. Desired outcomes for the practicum will be identified by the student in consultation with the faculty before agency/corporation placement is arranged. Objectives should be selected, which allow the student to focus on an area of informatics congruent with his/her individual career goals and opportunities available at the selected agency/corporation.

3.000 Credit hours

1.000 Lecture hours

2.000 Other hours

Schedule Types: Clinical

School of Nursing Division

Organizational Syst & Adult Hlth Department

NURS 740 - ADV PRAC PSYCH NURS INTERNSHIP

This capstone course is designed to provide the student with opportunities to synthesize learning experiences in psychiatric nursing. Under the guidance of a qualified preceptor, the student will enact the advanced practice psychiatric clinical specialist or psychiatric nurse practitioner role, applying theoretical and experiential knowledge from all previous coursework. The clinical practice requirements are based on the expected competencies for the advanced practice nurse in psychiatric mental health nursing as outlined by the American Nurses Association (2006) and the National Organization of Nurse Practitioner faculties (2003). Clinical conference sessions are designed to assist problem-solving framework, to determine optimal psychiatric mental health care for individuals, families, groups, and special populations.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 741 - PRACTICUM: INTEGRATIVE MANAGEMENT OF PRIMARY HEALTH CARE PROBLEMS

Focuses on preparing family nurse practitioner students to function independently at a beginning level of practice in a variety of primary care settings. Individualized practice with designated preceptor(s) provides the integrative clinical experiences necessary to refine specialized knowledge and skills in family practice and selected primary care settings.

7.000 Credit hours

Schedule Types: Clinical, Lecture

School of Nursing Division

Child, Women's & Family Health Department

NURS 742 - PRIMARY CARE OF THE HIGH-RISK NEONATE

Provides the skills necessary to provide primary health care to high-risk infants in the home and at followup clinics. Course material includes detailed physical assessment skills of the infant through the first year of life. The clinical component includes preparation for discharge, community resources, home visits and experience in the ambulatory setting. Small group clinical seminars focus on critical analysis of primary health care issues for the high-risk infant in the home and follow-up clinic. Through clinical practice, advanced clinical skill in the assessment, intervention, and management of the high-risk infant after discharge from the acute care setting through the first year of life is demonstrated.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Family and Community Health Department

NURS 743 - NEONATAL AND PEDIATRIC PHARMACOLOGY

Focuses on providing in-depth knowledge of commonly prescribed pharmacological agents used in the care of healthy and high-risk neonates, children and adolescents. Rationales for the use of the various pharmacological agents in the treatment of selected health problems are also presented. Clinical considerations in drug selection, as well as initiation, maintenance and

discontinuation of pharmacotherapy are examined. Legal requirements and implications for pharmacotherapy are reviewed.
3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 744 - RESEARCH SEMINAR IN ENVIRONMENTAL HEALTH

This research seminar will focus on the critique of environmental health studies with a special emphasis on understanding the challenges involving exposure assessment, defining and measuring non-specific health outcomes, and methods of participatory research. Students will begin to formulate research questions to examine nursing practice and other disciplines within the context of environmental health.
1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 748 - ADVANCED NURSING OF THE HIGH-RISK NEONATE II

Continues the development of the role of the advanced practice nurse in the management of normal and high-risk families and infants. Focuses on the continued development of the knowledge, skills and attitudes needed for expert physical and psychosocial assessment of high-risk neonates and their families. Special emphasis is placed on conditions and situations common to the neonate experiencing complications. Focuses on the acquisition of the psychomotor skills required for the care of high-risk neonates.
1.000 TO 7.000 Credit hours
1.000 TO 7.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 749 - ADVANCED NURSING OF THE HIGH-RISK NEONATE III

Focuses on continuing to manage care of the high-risk neonate with an emphasis on developing collaborative relationships with other members of the health care team in a clinical setting. Continuing discussion of the advanced practice role is also completed in this course. With completion of this course and NURS 742, all requirements specified by the National Certification Corporation (NCC) for the certification examination as a neonatal nurse practitioner are met.
1.000 TO 6.000 Credit hours
1.000 TO 6.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 750 - INTERDISCIPLINARY SEMINAR IN ENVIRONMENTAL HEALTH

This seminar will introduce students to the various roles occupational and environmental medicine physicians, industrial hygienists, toxicologists, environmental health epidemiologist play in promoting environmental health. This course allows the student to explore the interdisciplinary nature of environmental health. A topic is selected, with faculty input, and this topic is investigated through the lens of nursing, as well as other disciplines pertinent to the topic.
1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 751 - PSYCHOPHARMACOLOGY

Provides advanced knowledge of commonly prescribed psychopharmacologic agents. Patho-physiologic theories of the etiology of psychiatric disorders are reviewed. Rationales for the use of specific pharmacologic agents in the treatment of selected disorders across the life span are addressed. Examines distinguishing characteristics of various psychotropic medications and clinical considerations in the selection, initiation, maintenance and discontinuation of drug treatment. Legal, ethical and cultural implications of pharmacotherapy are also critically reviewed.
3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Behavioral & Community Health Department

NURS 752 - NEUROPHYSIOLOGY OF MENTAL DISORDERS

Introduces the neurobiological aspects of psychiatric disorders. Builds from a review of basic neuroscience, including neuro-anatomy, neurophysiology and psycho-neuroimmunology, to a study of selected functional systems of the brain. Current neurobiological research on selected psychiatric disorders is described. The fundamentals of neuroimaging, EEG, and other neurodiagnostic approaches are discussed.

2.000 Credit hours

2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 753 - PRACTICUM IN LEADERSHIP IN COMMUNITY/PUBLIC HEALTH

This is a 180-hour capstone clinical course (165 hours in clinical and 15 hours in seminar) that provides students with an opportunity to synthesize and apply knowledge acquired in nursing core and community health courses. It provides an opportunity for students to develop leadership skills. This course involves a precepted clinical public health nursing leadership placement, an analysis of leadership experience, and the completion of a project such as development of a new program initiative, planning for change in an organization's activities, evaluating an activity, analyzing leadership or policy issues, analyzing and evaluating health promotion/disease prevention outcomes, and participating in a community development project. Seminars related to clinical experience will be held every week for one hour.

4.000 Credit hours

4.000 Lab hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 754 - PSYCHOPHARMACOLOGY FOR CHILDREN AND ADOLESCENTS

Provides the opportunity for case study discussion on the use of psychopharmacologic agents with children and adolescents, using applied practicum cases at an advanced level. Emphasis is placed on integration of theory and practice and in-depth examination of the modifications in psychotropic drugs required for children and adolescents. Current research, ethical, and legal issues surrounding the use of psychopharmacology with children are emphasized.

1.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 755 - FAMILIES IN CRISIS

Introduces the systems theory orientation for understanding human functioning within a family system, with an application of this orientation to personal, patient/family and health care delivery systems. The family is the unit of study, with systems theory analyzed and applied to clinical issues and situations in various health care settings (acute, chronic, inpatient, outpatient and long-term care facilities). Clinical intervention with families and supervision are components of this course.

NURS 761 - POPULATIONS AT RISK IN COMMUNITY/PUBLIC HEALTH

Focuses on the mission of public health and the various organizations that support the responsibilities of public health at the international, national and local levels. Processes and dynamics, such as family systems, support and risk communication, that influence public health and populations at risk, are explored. A risk assessment analysis is used to select a population at risk. Factors that influence the effectiveness of health promotion/disease prevention programs and projects targeted to aggregates, families and populations are analyzed. Responsibilities of community/public health clinical nurse specialists are explored in relation to core public health functions: assessment, policy development, and assurance.

NURS 767 - LEADERSHIP FOR MAGNET STATUS

The Magnet Recognition Program, administered by the American Nurses Credentialing Center (ANCC), is designed to recognize acute care nursing services that have achieved high levels of excellence in the provision of nursing services and demonstrate the ability to attract and retain professional registered nurses. Designation as a Magnet Hospital is the highest level of recognition that ANCC can accord to an organized nursing service. This course critically examines the history, structure, procedures and processes of the Magnet Recognition Program. Particular attention is given to the methodology used to evaluate applicant agencies and the nursing research base related to the Magnet phenomena is explored.

3.000 Credit hours

NURS 768 - CLINICAL PRACTICUM FOR ADULTS ACROSS THE LIFESPAN

A 225 hour clinical practicum per semester in a variety of community-based clinical settings (including but not limited to) college health services, health maintenance organizations, community clinics, long term care, assisted living, continuing care retirement communities, occupational health settings, and private practice will stress application of concepts presented in the Diagnosis and Management course. The student will gain increased expertise in communication skills, health assessment skills, interpreting findings, applying epidemiological concepts and developing and implementing plans of care for adults across the lifespan with health maintenance needs, and/or common acute and chronic health problems. The focus of this clinical experience will be on initial workups of new patients, limited short-term relationships with these patients and the evaluation and management of patients with self-limiting acute problems, or stable chronic illnesses as a beginning step in learning diagnosis and management of health problems.

1.000 TO 5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 769 - SOCIETY, HEALTH AND SOCIAL JUSTICE

This course examines social, cultural, and political-economic determinants of health from sociological and social epidemiological perspectives. The concept of social justice is used as a conceptual framework to investigate population health inequities that exist in social class, race, ethnic and gender groups in the United States. The course addresses the central question: ¿How does the structure of the society influence the health and illness experience of its population?¿ The course examines what a society is, how it works, and what the pathways are through which social forces differentially impact class, race, and gender groups. The course will focus on specific meso-social contexts, such as the workplace, the community and the physical environment, which are particularly important in transmitting macro-societal forces to the individual. The process of globalization and the role of social movements in shaping public health will also be discussed. The course concludes by examining innovations in health policy and practice that are currently emerging in an effort to address the adverse health impact of inequitable social environments.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 770 - HUMAN FACTORS OF HUMAN AND COMPUTER INTERACTION

This course examines systems in which people interact with technology, with a focus on information systems in the healthcare setting specifically. In order to understand these socio-technical systems, we must understand both the users of the system, and the technology itself. This requires an understanding of both psychology, and system design. There will be an emphasis on examining and critiquing current literature on the topic, with a focus on experimental and research methodology of the research discussed in class.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 771 - ANTEPARTUM MIDWIFERY

Provides theoretical and practical preparation to provide women with safe and effective nurse-midwifery care during an essentially normal pregnancy. Applies the nurse-midwifery management process and model, which incorporates current theories and evidence-based research and clinical experience relevant to nurse-midwifery, to the provision of care to healthy women and women at risk. Focuses on health promotion, addresses risk assessment of deviations from normal in pregnancy and addresses collaboration with other health professionals.

4.000 Credit hours

4.000 Lecture hours

NURS 775 - HOME HEALTH CARE NURSING

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 777 - DIAGNOSIS AND MANAGEMENT OF ADULTS

The student will focus on development of critical thinking skills to address to address health care problems of adults across the lifespan, develop differential problem solving skills and determine appropriate management interventions. The management of common acute and chronic health conditions will include evidence based primary preventions, drug and treatment therapeutics, and referral to other health care providers. Traditional nursing strategies such as education, interpersonal communication, and counseling will continue to be stressed. Case study analyses, group process, lecture and on-line modalities are the principal teaching methodologies used to promote student centered learning.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 778 - GYNECOLOGICAL MIDWIFERY

Provides theoretical and practical preparation to provide safe and effective nurse-midwifery care to essentially healthy non-pregnant women throughout the life-span. Applies the nurse-midwifery management process and model, which incorporates current theories, evidencedbased research and clinical experiences relevant to nurse-midwifery, to the provision of care to healthy women and to women at risk who seek gynecologic care including family planning, preconception counseling, late postpartum care, perimenopausal and menopausal care and care for sexually transmitted diseases and reproductive tract infections. Emphasizes health promotion, appropriate screening, cultural sensitivity and family-centered care.

4.000 Credit hours
4.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 779 - INTRAPARTUM MIDWIFERY

4.000 Credit hours
4.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Child, Women's & Family Health Department

NURS 780 - MIDWIFERY PROFESSIONAL ROLES

Provides theoretical and practical analyses of the professional role of the certified nurse-midwife. Addresses the history of nurse-midwifery, components of the nurse-midwifery role, the administrative and economic issues of nurse-midwifery practice, legislative and regulatory issues, collaboration with other professions and legal and ethical issues in nurse-midwifery practice.

1.000 Credit hours
1.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 781 - ADVANCED ASSESSMENT OF COMPUTER-ASSISTED INSTRUCTION

Explores the psychological underpinnings of computer-assisted instruction and challenges the participants to apply those theories in the development of working products. Introduces several software authoring products available on the market (e.g., Authorware, Toolbook, Hyper-Card), and focuses on Hyper Text Markup Language (HTML), the language that forms the basis of the phenomenon known as the World Wide Web. Media-rich interactive programs in HTML are produced and made available on the World Wide Web.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 782 - COMPLEX MIDWIFERY

Provides theoretical and practical preparation to provide safe and effective nurse-midwifery care to women and newborns who are at risk or require complex care. Applies the nurse-midwifery management process and model, which incorporates current theories, evidencebased research and clinical experiences relevant to nurse-midwifery, to the provision of care to women and newborns and to women during pregnancy, childbirth, the postpartum period and throughout the lifespan. Emphasizes an enhanced research-based knowledge of perinatal and gynecological complications, triage, risk assessment and collaborative practice. Prerequisites: NPHY 608, NURS 605, NURS 706, NURS 723, NURS 771, NURS 778, NURS 779. Concurrent: NURS 780.

7.000 Credit hours
7.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 783 - MIDWIFERY INTEGRATION

Concludes the theoretical and practical preparation to provide safe and effective nurse-midwifery care both to healthy women, with a focus on the childbearing years, and to healthy newborns, as well as to women and newborns who are at risk or in need of complex care. Focuses on the assumption of direct responsibility for the management or co-management, collaboration or referral as appropriate, of the patient's obstetrical and gynecological or neonatal care. Applies the nurse-midwifery management process and model, which incorporates current theories, evidence-based research and clinical experiences relevant to nurse-midwifery, to the provision of care. Applies the knowledge acquired during previous coursework and clinical practice in a collaborative, independent, comprehensive and safe manner with preceptors and faculty who serve primarily as resources to confirm or augment management plans. Prerequisites: NPHY 608, NURS 602, NURS 606, NURS 701, NURS 706, NURS 723, NURS 771, NURS 778, NURS 779, NURS 780, NURS 782.

8.000 Credit hours
8.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Family and Community Health Department

NURS 784 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Provides a managerial perspective to methodologies, procedures and politics for the execution of projects in the health care/information technology marketplace. Examines how projects can be managed from start to finish, including specific emphasis on planning, controlling and risk management to avoid common pitfalls. Topics include essential project management concepts, needs identification requirements planning, project costing, scheduling, resource allocation, project politics, roles, responsibilities and communications, vendor management, work management and what to do when challenges arise. Based on a model for health care informatics practice, and emphasizes learning to plan, organize, direct and control information technology projects.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 785 - HEALTH CARE DATABASE SYSTEMS

Addresses how data are captured, stored, structured, processed and retrieved in automated systems. Relevant examples and practical applications of database design, construction, implementation and maintenance within a health care context are studied. Central topics include database design, data structures and modeling, development of database management systems, manipulation of data within a database using query language, database security and using databases to address problems in health care settings.

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 786 - SYSTEMS ANALYSIS AND DESIGN IN HEALTH CARE

Provides an understanding of the most common tools, techniques and theories currently used in systems design and analysis. Studies the process of information systems development in which technical, organizational and human aspects of systems are analyzed and changed with the goal of creating an improved system. Emphasizes that, in spite of the advanced technology surrounding computer-based information systems, the process of systems analysis and design largely remains an art, dependent on the skills of individual analysts and designers, based on established principles, methods and tools.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 787 - THEORETICAL FOUNDATIONS OF TEACHING AND LEARNING

This course will provide a foundation in theory and application of essential knowledge for teaching students, consumers and continuing education in a variety of settings. The course content begins with an introduction to teaching and learning and the history of medical education and traditional education. Content will focus on answering the following questions: what is learning; what do learners need to learn; how is learning organized; and who are the learners.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 788 - COMPLEX CLINICAL PRACTICUM FOR ADULTS

This course will build on concepts presented in the Diagnosis and Management of Adults Across the Lifespan (NURS 620) course. The focus is on refining health assessment skills, interpreting findings, developing and implementing appropriate plans of care to meet common health maintenance needs of adults and to promote the health of adults with more complex health problems. The student will gain increased expertise in communication skills, health assessment skills, interpreting findings, epidemiological concepts and developing and implementing plans of care. The emphasis will be placed upon managing an aging population with complex, chronic healthcare needs and promoting healthy behaviors across the lifespan.

1.000 TO 4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 789 - ADVANCED DIAGNOSIS AND MANAGEMENT OF ADULTS

This course prepares the student to diagnosis and manage complex, multiple and chronic health needs of adults across the lifespan in primary care settings. Diagnostic reasoning skills and advanced decisionmaking are refined. Specific attention is paid to role, legal, policy, and healthcare finance issues relative to primary care nurse practitioners. The student will focus on the progression of the patient problem, refine differential problem solving skills and determine appropriate management interventions. The student is expected to synthesize previously learned concepts in primary care nursing.

4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 791 - INSTRUCTIONAL STRATEGIES AND ASSESSMENT

This course prepares the student to select and implement instructional strategies and media that are appropriate to the learning style of the learner, the content to be taught, the behavioral objectives of the learning material and the processes of learning. The course includes both didactic and experiential experiences and provides a strong linkage to techniques for evaluating the impact of various instructional strategies on learning. Attention is given to basic measurement principles of reliability and validity, test construction, assessing skill acquisition and competence, and interpreting results from measures.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 792 - PRACTICUM IN TEACHING

Theoretical knowledge and skills acquired in pre-requisite courses will be applied in a practicum of teaching experiences that is precepted by a master teacher. Individual aspects of the practicum will be negotiated between the student, preceptor, and faculty facilitator in a learning contract. In addition to the practicum, students will engage in an online seminar. Seminar topics will focus on role development, issues and future trends in nursing and health professions education and ethical and legal influences on teaching and learning.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 793 - ORGANIZATIONAL TRANSFORMATION

This course will provide a foundation creating and teaching in online learning environments. The focus areas are pedagogy, infrastructure, design and teaching online. Topics important for online learning will include reconceptualizing courses from traditional classroom to online environments, designing, teaching, and managing online and hybrid learning environments, interacting with learner's online, assessing student learning and evaluating courses.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 794 - CLINICAL PRACTICUM IN PRIMARY CARE II

In this clinical course taken concurrently with Advanced Diagnosis and Management of Adults Across the Lifespan, the student functions as an adult/gerontological nurse practitioner in primary care settings including but not limited to: college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, and private practice) with adults who have complex and multiple health problems. The student will synthesize and integrate previously learned concepts to promote the health of adults and develop more independent diagnosis and management of patients with multi-system problems. Using a problem solving approach and evidence based practice guidelines, the student will determine an optimal plan in relation to both short and long-term health related goals for clients they see on an ongoing basis. Emphasis is on increased independence and decision-making in a multidisciplinary environment. The student is expected to assume an increased responsibility for the quality of health care rendered and to participate in evaluative activities.

1.000 TO 5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 795 - SYNDROME MANAGEMENT OF OLDER ADULTS

In this clinical course, the student functions as a gerontological nurse practitioner in health care settings with older adults who have multiple health problems and complex clinical syndromes. The student will be able to synthesize and integrate previously learned concepts to further refine the advanced application of assessment, differential diagnoses skills, and increasingly independent development of appropriate therapeutic interventions for the older adult who presents with complex clinical syndrome in a variety of settings.

2.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 796 - ADVANCED CLINICAL PRACTICUM IN ADULT ONCOLOGY

This course is designed to introduce the student to the advanced practice role in adult oncology either within the context of her/his degree granting program or in the context of a post-master's certificate program. The course promotes refinement of skills in assessment, diagnostic reasoning and clinical decision-making, developing plans of care, and implementing and evaluating nursing interventions for oncology patients. The emerging role of the advanced practice oncology nurse within the health care delivery system is also emphasized. The theoretical and empirical bases for diagnosing and managing adult patients with cancer-related problems are examined.

1.000 TO 4.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 797 - POLICY POLITICS NSG HLTH CARE

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 808 - SPECIAL PROBLEMS IN NURSING SCIENCE

Provides the opportunity to study a topic of interest within nursing science under a faculty member's guidance. Specific objectives and requirements are determined by contractual agreement prior to registration.

1.000 TO 6.000 Credit hours

1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 810 - EVIDENCE BASED POLICY DEVELOPMENT

The purpose of this course is to enhance doctoral students' understanding of the role of existing evidence in the development of evidence-based health policy in the private and public policy arenas. Theoretical bases and strategies for evidence-based health policy development will be analyzed. Funding sources for policy-influencing evaluation and research will be explored. Leadership skills in the areas of developing evidence-based policy, garnering grass roots support, and communicating a policy message to the media and policy-makers will be developed. Examples of translation of evidence into health policy decisions at the professional, organizational, state, federal, and international levels will be critiqued, and doctoral students will analyze the policy implications of evidence related to their respective research interests and practice specialties.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 811 - MEASUREMENT OF NURSING PHENOMENA

The theoretical basis of measurement is presented as a foundation for the development and evaluation of measurement instruments for use in nursing research. Types of measures, techniques of construction, the statistical analysis of reliability and validity, strengths and limitations for use of selected measures in nursing research are presented. Nursing research studies are evaluated relative to measurement theory. Tools and procedures, including those used to measure affective, cognitive, behavioral and physiological aspects of selected concepts, are evaluated.

3.000 Credit hours

NURS 814 - DESIGN OF NURSING RESEARCH II

The course provides an overview of non-experimental research designs (e.g., cohort, case-control, survey), measures such as incidence and prevalence, and related analytic procedures (e.g., logistic regression) for the study of nursing problems. Sampling theory and strategies for conducting probability sampling are also included.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 815 - QUALITATIVE METHODS IN NURSING RESEARCH

Provides an overview to the qualitative paradigm and major approaches to qualitative research. Topics related to qualitative research design, conduct, reporting and evaluation of qualitative research are addressed. Emphasis is placed on the appropriate use of qualitative methods and differences across qualitative approaches. The course focuses on the development of interview skills, observation skills and data analysis.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 816 - MULTIVARIATE ANALYSIS IN SOCIAL AND HEALTH CARE RESEARCH

Social and health care research deals with complex, multidimensional systems, and any adequate assessment of these systems requires that multiple measures be used. Topics introduced in this course include multiple regression, path analysis, logistic

regression, principal components analysis, factor analysis and discriminant function analysis.

4.000 Credit hours

4.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 817 - LONGITUDINAL DESIGNS IN HEALTH CARE RESEARCH

Designs in which multiple observations of one or more variables made on a single person or unit (repeated measures designs) or subjects are followed for a long period of time are of particular importance in nursing and health care research. The course will examine several of the more commonly used longitudinal analyses, including ANOVA, linear mixed models, and survival analysis. Designs involving repeated measures on more than one dependent variable, fixed and random effects, and time to event will be considered. Emphasis will be placed on selecting the appropriate design, statistical procedure, and computer program for addressing a given research problem. Small research exercises requiring both computation and interpretation will be assigned in order to promote desired learning.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 818 - SPEC TOPICS NURSING RESEARCH

Research Practica are designed as independently arranged research experiences in which the student actively engages in research activities under the mentorship of a faculty member. These activities are negotiated between student and faculty and relate to either an aspect of the faculty member's research related to the student's research area, or the student's research area. Six credits of research practica experiences, using the 3-hours/credit/week formulas are required with at least three of these being with the student's Research Advisor.

1.000 TO 6.000 Credit hours

1.000 TO 6.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Educ Admin Hlth Pol & Informat Department

NURS 819 - RESEARCH ROTATION

Introduces the active research programs in the School of Nursing with application of various research methodologies to specific research projects. Applies research principles learned previously in each rotation. In the 2 or 3 credit options, 6 or 9 hours per week are spent in one research program and in the 5-credit option, 15 hours per week are spent in each of two successive seven-week sessions in two research programs. During each session, objectives are defined with the faculty researcher and work is completed on a component of the faculty researcher's project. Activities include literature review, measurement, data collection, statistical analysis, manuscript preparation or proposal development.

1.000 TO 5.000 Credit hours

Schedule Types: Lecture

School of Nursing Division

Adult Health Nursing Department

NURS 820 - META-ANALYSIS

Introduces the issues in and methodology for the quantitative synthesis of research literature. Includes a practical overview of meta-analysis methods for synthesizing and exploring variations in quantitative indices of study outcomes.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Organizational Syst & Adult Hlth Department

NURS 826 - STRUCTURAL MODELING IN HEALTH CARE RESEARCH

Provides an introduction to the construction and estimation of structural models in the context of health care research. Topics include confirmatory factor analysis, path analysis and causal modeling. Emphasis is on the estimation of models with latent variables, interpretation of causal effects and the application of these models in health care research.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Educ Admin Hlth Pol & Informat Department

NURS 828 - ISSUES NURS SCHOLARSHIP

Identifies and analyzes professional issues confronting the nurse scholar. Issues including research priorities, options in career patterns, ethics and politics of science, protection of human subjects, grants, publishing and presenting research are presented and discussed and appropriate applications to the role of nurse-scholar are made. When appropriate, diverse perspectives will be presented. Students are expected to synthesize the material and identify the principles appropriate for their own career. Prerequisite: NURS 811.

2.000 TO 3.000 Credit hours
2.000 TO 3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 830 - WORKING WITH LARGE HEALTH CARE DATABASES

This course is designed to bridge the gap between nurses' need for information/data and the reality of finding the data, downloading, extracting, and building an effective personal database. Much of the class work will be conducted in the computer lab where students will explore public and private sources of health data that are available via the internet and on CD_ROM. Students will download data to the personal computer, import data into varied software applications, and build a personal database using software of their choice. Prerequisites: A basic knowledge of personal computers including the Windows environment, the use of a mouse, and basic file handling is expected. Knowledge of spreadsheets and databases is a plus. No knowledge of statistical software is needed, although highly desirable for doctoral students.

2.000 Credit hours
2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 832 - HEALTH SERVICE RESEARCH

This course is designed for doctoral students who are interested in examining outcomes research issues. The class content focuses on the conceptual and technical issues encountered in designing and executing these types of research studies. Assignments allow students to design a study in their area of interest, including the identification of potential problems and approaches to dealing with those problems. Prerequisites: NURS 850, NURS 851 and NURS 840 (Students are required to have had a course in theory development and research design. In addition, a basic knowledge of personal computers, data manipulation, and statistical software is expected.)

3.000 Credit hours
3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 833 - THE EVIDENCE BASED PRACTICE PROCESS

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 834 - TRANSLATING EVIDENCE PRACTICE

This course focuses on how to translate, evaluate and disseminate evidence in a contemporary health care environment. Individual, organizational and global barriers to translating evidence into practice are explored. Evidence will be summarized and an action plan will be developed to produce valid and reliable clinical recommendations for dissemination into practice. An evaluation plan that includes the patient, health care providers and system outcome measures will be designed to measure the success of the evidence based practice initiative. The integration of nursing theory and theories from other disciplines to guide practice will be emphasized.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 835 - EVIDENCE BASED PRACTICE PRACT

This course applies the evidence-based practice theoretical knowledge, skills, and attitudes from pre/co-requisite courses

through a precepted experience (135 hours total). In an approved practicum site, the student applies their knowledge and skill under the supervision of an experienced faculty and preceptor. Each student will develop an individualized learning contract defining the activities by which they will demonstrate attainment of the course and personal objectives. Discussion and written assignments will allow students to comparatively analyze theoretical and conceptual principles with those experienced in the field. A seminar will provide a forum for discussion of issues and special relevant topics. Individual aspects of the practicum will be negotiated between the student, preceptor, and faculty facilitator.

3.000 Credit hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 836 - DECISION MAKING NURS INFORMATI

Reflects the central role of decision science in utilizing nursing informatics to improve patient care. Analyzes selected decision science theories and relevant research that supports and directs the field of nursing informatics. Decision sciences include statistically based models of clinical judgment, information processing theory of clinical judgment and theories for knowledge and skill acquisition. Case simulations, protocol analysis, knowledge engineering, decision analysis models, grounded theory, neural networks and ways of knowing are evaluated for their usefulness to nursing informatics. Prerequisites: NURS 737, NURS 840, NURS 850 and NURS 851

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Educ Admin Hlth Pol & Informat Department

NURS 837 - NURSING INFORMATICS IN QUALITY OF CARE

Addresses aggregate-level data analysis in the application of nursing informatics in describing, improving, measuring and delivering quality care. Employs a broad definition of systems and analyzes selected systems theories and relevant research, which supports and directs the field of nursing informatics and its use of available and emerging technology. Theories are applied to the study of systems to determine how their definitions and boundaries facilitate the application of quality of care models and enhance the access, quality and cost-effectiveness of care. A multidimensional model provides a framework for studying the direct and indirect effects of nursing informatics technology.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 840 - PHILOSOPHY OF SCIENCE AND DEVELOPMENT OF THEORY

Reviews the nature of knowledge and theory in the various scientific disciplines. Describes and analyzes the revolutions or paradigm shifts that have occurred in science. The struggle between many world views is discussed including empiricism, positivism, rationalism and the hypoductive model of science. After considering the ways of knowing (epistemology), selected world views and theories from a variety of disciplines are analyzed. Discusses strategies for developing nursing theories and introduces alternative metatheoretical approaches available for use in theory evaluation in nursing.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 841 - THEORY AND CONCEPTUALIZATION IN NURSING SCIENCE

Focuses on the nature of theory in scientific disciplines, nursing theory within the context of the philosophy of science and the evolution of nursing science and the application of conceptualization to the process and conduct of nursing research. Interrelationships between components, context and structure of modes of systematic inquiry, the conceptual basis of theory development and a variety of mid-range theories and their paradigms are analyzed. Contribution of these modes, concepts and theories (practice, mid-range, grand) to knowledge generation and theory development in nursing is critically evaluated in relation to nursing science and applied to student's area of interest.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division
Nursing Department

NURS 850 - EXPERIMENTAL NURSING RESEARCH DESIGNS

This course focuses on the relationship between theory and design and selected experimental and quasi-experimental research

designs. Threats to both the internal validity and the construct validity of research designs are explored as well as ways of minimizing them. Issues of bias, representativeness, and generalizability are discussed in relation to probability and nonprobability sampling.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 851 - ANALYSIS FOR EXPERIMENTAL NURSING RESEARCH DESIGNS

This course is designed to be taken concurrently with NURS 850: Experimental Nursing Research Designs and provides the theoretical and practical knowledge to conduct analyses of experimental data. The course focuses on: 1) the identification and uses of appropriate descriptive and inferential statistics; 2) the acquisition of data manipulation skills necessary to conduct experimental and interventional research; and 3) the development of analytical writing and data summary skills. Hypothesis testing with various levels of measurement, and inferential statistics will be examined. The relationships between design and analysis are revealed through the development of an analytical plan. The procedures for compiling data, developing a research file, and documenting the file are specified. Analytic techniques address descriptive statistics, measures of association, ANOVA, and simple regression.

3.000 Credit hours

2.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 852 - NON-EXPERIMENTAL NURSING RESEARCH DESIGNS

Focuses on non-experimental research designs, including descriptive, cross-sectional, survey, prospective, retrospective, exploratory and qualitative. Incorporates similar approaches including consideration of the validity of the designs as well as bias, sampling, rigor and application of non-experimental research design approaches to researchable nursing questions.

3.000 Credit hours

3.000 Lecture hours

Schedule Types: Lecture

School of Nursing Division

Nursing Department

NURS 853 - ANALYSIS FOR NON-EXPERIMENTAL NURSING RESEARCH

Focuses on analytical approaches used to design and conduct non-experimental research and approaches to data reduction and data summary common to non-experimental studies. Addresses analytical issues related to survey and qualitative research, including coding of open-ended questions, handling of missing data, weighing data and non-parametric testing. Reviews software used for data collection, data reduction and reporting.

2.000 Credit hours

2.000 Lecture hours

NURS 898 - PRE-CANDIDACY RESEARCH

Allows pre-candidacy students to study a topic of professional interest with a graduate faculty member who has special competence in the subject area. Specific objectives and requirements are determined by contractual agreement prior to registration.

1.000 TO 8.000 Credit hours

Schedule Types: Research

School of Nursing Division
Organizational Syst & Adult Hlth Department

NURS 899 - DOCTORAL DISSERTATION RESEARCH

Dissertation credits are taken after admission to candidacy for the doctoral degree. The credits taken during a given semester should reflect the expenditure of time (student's and advisor's) on dissertation related activity. A No Mark (NM) grade is assigned to NURS 899 credits until after the dissertation defense is completed. This seminar, based upon a student-centered learning approach, provides peer and faculty support to students planning to undertake individual research studies, usually (but not limited to) doctoral dissertations. Students develop course and individual objectives the first day of class. A topical outline for class sessions during the semester is agreed upon during the second class meeting. Course and individual objectives usually include development of individual research designs, instruments, and data analysis plans, literature reviews and a written research prospectus. Didactic presentations include the components of a dissertation proposal; methods for negotiating the system including selecting and working with committees, selecting and securing agency cooperation, and Institutional Review Board approval. The majority of class sessions are devoted to student presentations of their research plans with group feedback to strengthen these plans.

1.000 TO 12.000 Credit hours

1.000 TO 12.000 Lecture hours
