LIBRARY SERVICES FOR RESEARCHERS

The Health Sciences and Human Services Library offers resources and services to support your research, including:

- **E-resources**
  The library offers on-campus and remote access to e-books, journals, and databases via the library's website.

- **Consultations**
  Librarians are available to meet faculty, staff, and students by appointment to assist with information and literature searching.

- **Workshops**
  The library offers workshops throughout the year on topics such as database searching, RefWorks, new information technologies, and more.

- **Information Management**
  Librarians can teach you how to use RefWorks, a citation management tool, to help you organize your references for your next publication.

- **Grant Collaborations**
  When submitting a grant proposal to a federal agency like the NIH, talk to a librarian about including a request for library support. Funds can be used to support literature searching, community outreach, training, and more.

- **Presentation Practice Studio**
  Practice, record, and develop presentations and your public speaking skills using the equipment in our soundproof Presentation Practice Studio. Appointments are necessary.

- **Systematic Reviews**
  Librarians can support investigators throughout the process of conducting a systematic review, from developing search strategies for conducting comprehensive literature searches to writing the methodology section and managing results.

- **IRB Consent Forms**
  Librarians who serve on IRB panels are available to review consent forms before your IRB Protocol is submitted to help your protocol pass the IRB Review. Librarians are also available to present workshops on how to write consent forms that meet IRB standards.

- **Innovation Space**
  The Innovation Space offers 3D printing, 3D scanning, and other technology for faculty, staff, and students. We offer workshops and training for interested users of the space.

To learn more, contact:

Andrea Goldstein Shipper, School of Medicine Librarian   ashipper@hshsl.umaryland.edu   410-706-8868
