

# MAHSL CE LECTURE

March 7, 2006 9 a.m. – 1 p.m.

## Geeks Bearing Gifts: unwrapping new technology trends

This class taught by Dale Prince is intended to provide a fun, fast-paced, and informative introduction to and update on today's hottest technology trends. Program participants will be able to identify technology trends and they will understand how these trends will impact or can be integrated into traditional library services. Content will be presented in with a "can-do" focus intended to encourage participants to investigate at least one technology for implementation in their institution. Course structure will include brief vignettes and demonstrations of a wide variety of technologies. Some of the topics to be covered include instant messaging, podcasting, open source software, spyware and other malware, developments in mobile computing, blogs and wikis, radio-frequency identification, and more. This course has been approved for 4 hours of Medical Library Association Continuing Education Credits.

Participants will be able to

- develop an increased awareness of new and changing technologies
- understand how new and changing technology affects traditional library services
- be able to identify ways in which one or more of these technologies would be applicable to their institution

Sponsored by MAHSL, the Health Science & Human Services Library, and NLM.

Location: HSHS Library, University of Maryland Baltimore  
Lower Level PC Lab  
601 W Lombard Street  
Baltimore MD 21201
