

FREE MAHSL Lecture
***“Exploring Opportunities for Librarians in Healthcare
Information Technology”***

*November 2, 2012
10am – 1pm*

Instructors: Dean Karavite, MIS
Lead Human Computer Interaction Specialist
Children’s Hospital of Philadelphia

Course Description: Do you ever think that the healthcare informatics parade is passing you by?
According to Dean Karavite, there is something you can do about it!

In this talk Dean will provide a wide range of examples of how LIS skills and methods can be applied to HIT; from the design and implementation of search related tasks in the EMR to new developments in integrating knowledge repositories to support health care staff. There will be a brain-storming, interactive session where participants can suggest ways to get involved to play a more prominent role.

(We will provide menus and time for you to pick up your lunch from UMMS Student Services as we eat lunch with Dean in the classroom and continue the program’s discussion.)

Location: University of Maryland-Baltimore, Health & Human Services Library
601 W. Lombard Street
Baltimore, MD 21201
Distance Learning Room – Lower Level
