

From mastering the essentials of informatics to capturing, analyzing and using information to enable care integration across levels and settings of healthcare, SINI 2016 offers unique opportunities to learn from and interact with experts and leaders in informatics.

**FULL SCHEDULE AVAILABLE**

<http://www.nursing.umaryland.edu/sini>

**Keynote**

**Mary Alice Annecharico, MS, RN**, Senior Vice President and Chief Information Officer for the Henry Ford Health System will present leading and executing network integration of healthcare technologies.

**Endnote**

**Mary Beth Mitchell, MS, RN**, Chief Nurse Information Officer for Texas Health Resources will address strategies for successful informatics leadership in a changing healthcare system and demonstration of its' impact on patient outcomes.

**Preconference Sessions**

**Nursing Informatics Certification Review**

An intensive one-day review workshop to prepare informaticians for the ANCC NI Certification Exam. Workshop attendees will learn important concepts related to NI practice, models and theories, trends in health IT, systems design life cycle, human factor concepts, data management, and much more. Exam strategies and study resources will also be discussed.

**Data Analytics Toolkit: Show Me How to Use Analytics in My Practice!**

In the current health care environment, the skill sets for data utilization is a vital component. This one-day hands-on workshop will provide the participants with practical knowledge, skills, and a toolkit in data analytics. The course will focus on fundamental concepts and skill sets of data analytics in the area of clinical informatics and clinical decision making surrounding care quality, safety, and revenue generation, as well as their applications to the practice settings. (Note: Major technologies to be used during the workshop: KNIME, Tableau, Excel query, and other open source programs).
