

# SINI 2017

27th Summer Institute in Nursing Informatics

## Clinical Practice, Health, and the Internet of Things

**July 11-14, 2017**

University of Maryland School of Nursing, Baltimore, MD

## Call for Abstracts

**Opens: Thursday, Nov. 10, 2016**

**Closes: Friday, Feb. 3, 2017**

Master the essentials of informatics and explore technologies that enhance health, the health care environment, and patient engagement in a modern world. Known for providing unique networking opportunities with experts and leaders in informatics, the Summer Institute in Nursing Informatics (SINI) will introduce you to innovations leading and supporting practice transformation.

### Tracks

SINI 2017 features four educational tracks including a special track specifically for nursing informatics novices.

**Track A:** Essentials of nursing informatics in the age of the Internet of Things (Podiums & Posters)

*This track is designed for attendees with less than two years of experience in the health care informatics field.*

**Track B:** Integrating the Internet of Things into health management, personalized care, and patient engagement (Podiums & Posters)

**Track C:** Patient safety, clinical decision-making, and patient-generated data (Podiums & Posters)

**Track D:** Big data challenges related to population health and health information exchange (Posters Only)
