

A Brief History & Current Overview of the National Behavioral Consortium (NBC)

Stanford W. Granberry – Executive Director

Mission Statement

The mission of NBC is to enhance the quality of care and market place competitiveness of its members.

Vision Statement

To provide the NBC BH and EAP Members a unique forum to candidly discuss, collaborate and create pragmatic solutions to current and near term industry challenges and opportunities.

NBC was established 1998 as a not for profit Trade Association to provide a forum for BHO and EAP companies to discuss industry issues and collaborate on shared initiatives that promote the vitality of regional and national NBC organizations. Due to the limited size of our membership NBC provides a unique industry setting for substantive dialogue with colleagues about key industry issues. The NBC EAP Group is well recognized for its research contributions to the field.
