Published on Jan 28, 2013 by University of Maryland School of Medicine
The U.S. Supreme Court will not hear an appeal from two scientists who challenged federal funding of embryonic stem cell research.

The decision leaves in place President Obama's 2009 executive order expanding research on stem cells taken from human embryos, which many scientists say has the potential to produce breakthroughs in treatment of numerous conditions.

Dr. Curt Civin is director of the Center for Stem Cell Biology and Regenerative Medicine at the University of Maryland School of Medicine. In this video, Dr. Civin explains the impact.
